Highbury Avenue/Hamilton Road Intersection Improvements Environmental Assessment Study

Notice of Completion

The City of London has completed a Municipal Class Environmental Assessment (EA) study for improvements to the Highbury Avenue/Hamilton Road intersection. The study was completed in accordance with the planning and design process for a Schedule C project, as outlined in the Municipal Class EA (October 2000, as amended in 2007, 2011 and 2015).

The preferred intersection design includes the following key recommendations:

- Additional northbound and southbound through lanes along Highbury Avenue North;
- Eastbound channelized right turn lane;
- Westbound dual left turn lanes;
- Northbound channelized right turn lane;
- Eastbound and westbound bike lanes on Hamilton Road;
- Access management; and,
- Landscaping and urban design elements.

The Class EA process included public and agency consultation, a comparative evaluation of design options, assessment of potential impacts, and identification of mitigation measures. As part of the consultation program, two Public Information Centers were held (May 14, 2015 & March 9, 2016) to provide information on the project and to receive comments. Major businesses affected by the access management changes and property owners potentially affected by the full acquisition of their properties were also contacted to discuss the recommended plan.

An Environmental Study Report (ESR) has been prepared to document the decision-making process leading to the selection of the preferred design. This notice places the ESR on the public record for a **thirty (30) calendar day** public review period starting on **July 13, 2018** to be reviewed by members of the public and/or any other interested party at the following locations until **August 12, 2018**:
