Chair and Members
Environmental Stewardship and Action Community Advisory Committee

I hereby certify that the Municipal Council, at its meeting held on June 27, 2023, resolved:

That the following actions be taken with respect to the 6th Report of the Animal Welfare Community Advisory Committee, from the meeting held on June 1, 2023:

- a) the following actions be taken with respect to the <u>attached</u> report from the Animal Welfare Community Advisory Committee Sub-Committee:
- i) the above-noted report BE FORWARDED to the Environmental Stewardship and Action Community Advisory Committee (ESACAC); and,
- ii) the ESACAC BE REQUESTED to consider the following actions from the abovenoted report:
- A) the recommendations:

///-

- B) the proposed language for the brochure;
- C) the image from the Upper Thames River Conservation Authority signage; and,
- D) the example from the Province of Alberta's Don't Let it Loose Campaign;

it being noted that the above-noted report from the Animal Welfare Community Advisory Committee Sub-Committee was received:

b) clauses 1.1, 3.1, 3.2, 5.1, 5.3 and 5.4 BE RECEIVED. (2.1/10/CPSC)

M. Schulthess City Clerk

/jb

cc: Chair and Members, Animal Welfare Community Advisory Committee

Report from Sub-Committee to AWCAC Meeting June 1, 2023

Comments on Proposed Goldfish Brochure

Background

At the April AWCAC meeting, a draft brochure titled "Protecting our waterways" was discussed. The brochure was prepared by the City's Ecological Community Advisory Committee and submitted to AWCAC for comments. AWCAC members made some editorial comments and raised two issues. The editorial comments were:

- 1. The title "Protecting our waterways" does not indicate that the information is about goldfish.
- 2. The sign in the photo is too small to read.
- 3. The photo of the goldfish needs some text to explain that these fish can grow very large. A reader might assume they are different types of fish.
- 4. Include stormwater ponds as a place where infestations currently occur. These ponds are near homes and are an attractive place to release a pet fish because the kids can "visit" their fish. Goldfish are routinely captured and killed when these ponds are drained for maintenance or cleaning.
- 5. The three references to fish as "it" should be deleted because fish are not inanimate objects. Using plurals allows "it" to be changed to "them".

The two issues discussed by AWCAC members focused on whether the brochure should include a list of alternative fish to purchase instead of goldfish, and a proposal by a member of the Ecological Community Advisory Committee to include information about euthanizing unwanted goldfish. These issues were referred to the AWCAC Sub-Committee. Brendan Samuels, Chair of the Ecological Community Advisory Committee, attended the May AWCAC meeting as a delegation to discuss these issues.

Recommendation

The AWCAC Sub-Committee has two recommendations:

Delete the suggestion to purchase other types of fish.

Like goldfish, these other species should not be released into waterways as they also cause problems and will likely die.

The suggestion to purchase African Dwarf Frogs is particularly troublesome as they are often sold in inhumanely small plastic containers inaccurately described as "biospheres" or "frogospheres".

Instead of suggesting alternative species to buy, more information about the lifespan of a goldfish and the difficulty of re-homing should be included to encourage people to think about the consequences of acquiring a fish as a pet.

• Omit information on euthanasia.

The AWCAC Sub-Committee looked at materials used in other jurisdictions and is including those used in Alberta as a good example because they are informative and easy to read.

The AWCAC Sub-Committee feels strongly that it is beyond the role and scope of advisory committees to recommend euthanizing an unwanted pet. Further, advising someone on how to "humanely" euthanize a pet is fraught with problems if performed by pet owners. It may result in unintended suffering for the animal, is considered cruel, and must be performed by trained veterinarians.

Rather, we recommend a preventative approach such as highlighting the consequences of acquiring goldfish. Information on how to re-home them if necessary and other considerations that should be given careful thought before purchasing a goldfish should be included in the brochure.

Proposed Language for Brochure

Is a Goldfish the Right Pet for You?

Goldfish might seem like inexpensive, easy to keep, and fun starter pets for kids. But they are not for everyone.

- A goldfish is not a temporary pet. They need proper care for their entire lifespan of five, ten or even more years.
- A bowl is not an appropriate container. It costs money to set up an aquarium and buy essential equipment like a gravel vacuum, filter, heater and air pump, all of which run on electricity.
- Caring for goldfish is more than just feeding. You must regularly clean the aquarium and test the water chemistry. Sick goldfish need special care.
- Aquariums are not portable. Someone will have to come to your house to take care of your goldfish while you are away.
- It may be difficult to find a new home for your goldfish if you cannot care for them. Goldfish should never be flushed or released in a pond or waterway. Killing a pet for convenience is never right.

<u>Signage</u>

Upper Thames River Conservation Authority and the City of London have posted signs saying do not release goldfish. This was posted at Sifton Bog:

Alberta's "Don't Let It Loose" Campaign

In 2015, in response to large numbers of goldfish in stormwater ponds, Alberta Environment and Parks (AEP) launched a "Don't Let It Loose" campaign. Educational materials included a poster and leaflets on several species. A screen capture of the poster, general brochure, and specific brochure about goldfish are included in this report for reference. In addition to a catchy slogan (we would prefer "Don't Let Them Loose"), they have interesting graphics and a fair amount of information. There is no mention of alternative species to buy or euthanasia.

Never release aquarium or domestic pond water, plants, dead or live animals into waterbodies. Common aquarium and pond plants and animals can become invasive when released in the wild, altering habitat, increasing competition for limited resources and spreading disease to native species.

- Releasing fish or other aquatic species is illegal and can result in large fines, or even jail time!
- Goldfish populations have been found throughout Alberta. They are surviving the winter, altering water quality, and reproducing rapidly.
- Pour unwanted aquarium water over dry land and freeze aquarium plants before throwing them in the garbage.
- Unwanted pets can be disposed of humanely by returning them to pet stores, donating to schools or community organizations or given away.
- Make sure to bury your fish after it passes away
 flushing it down the toilet can lead to the spread of unwanted diseases.

GOLDFISH

(CARASSIUS AURATUS)

100+ LOCATION

across Alberta where goldfish have been illegally dumped

Number of goldfish removed in 2017 from storm water ponds in St. Albert

Bull Trout Native to Alberta

Goldfish in the wild:

- increase water cloudiness, blocking light
- increase the growth rate of blue-green algae
- reduce native plants that produce oxygen
- carry exotic diseases and parasites

Average number of eggs laid by a single female in a spawning period

What to do with unwanted goldfish?

- Donate to a friend or school
- . Return them to the pet store

Don't flush your fish! Goldfish carry diseases that could harm native fish Bury them instead

Help us protect Alberta's waters by never releasing aquarium water, plants and animals into the environment.
