

We live northeast, we heard fireworks 3 days before and 3 days after canada day, some at midnight, 2 or 3 am. There were also a few set off a week later. Besides my dog losing her mind for an hour when they go off, we really don't appreciate being awakened to the sound of explosions in the middle of the night. We called the police, and we emailed every city councillor about it. Obviously they're not able to do much about it. So, if you cannot enforce the law or bylaw you absolutely need to completely BAN neighborhood fireworks. Please go with Plan B - ban their sale and use for neighborhoods.

Thanks

Geoff Rhodes
