Subject: [EXTERNAL] Opposition to hun at 705 Fanshawe Park Road

Good afternoon,

As a born and raised Londoner and Ward 7 constituent, I am writing today to put forth my opposition to the proposed homeless hub at 705 Fanshawe Park Road. My reasons are as follows:

1. Re-zoning - the original plans for the first 3-5 hubs required that the new locations would not need rezoning. The proposed location is not zoned to accommodate an Emergency Care Establishment. Why is council circumventing its own guidelines and making an exception for this particular location? To the public, this may bring the integrity of council and its members into question, which is obviously not ideal when such a contentious issue is at play.

2. As per the location criteria of London's Health And Homelessness Response: Proposed Hub Implementation Plan, hubs should not be in close proximity to elementary schools or daycare centres. In essence, hubs should not be near child-centric centres within the community. The proposed location is next door (170 metres) from the Thames Valley Children's Centre location that services children with autism. This location is also next door (within 110 metres) to a children's toy store, notably, Mastermind Toys. As was mentioned in the Health And Homelessness Movement For Change document sent via email on September 21st, 2023, open drug use will not be forbidden at any hub, "A low barrier and harm reduction approach recognizes that some people will use drugs and so practices need to be in place to ensure this happens in the safest possible way." We can all agree that there is never an appropriate situation wherein a child should be exposed to, or witness, illicit drug use. Location criteria were included in the guidelines for a reason - to limit exposure of vulnerable segments of the population. Please keep our children safe and allow them the right to access services and businesses in a safe and secure manner. I do not feel safe parking my car and walking to work (I work downtown), or leaving work and walking to my car. Let alone my lunch breaks. My safe space is supposed to be my home, where my children will grow up and my city staff is taking MINE AND MY CHILDREN'S rights to feel safe away.

3. In the Report To Strategic Priorities and Policy Committee, July 24th, 2023, the location criteria was to ensure, ".....a feeling of safety and security within this new system for all Londoners, including individuals being served, business owners and customers, and community members in neighbourhoods". As was made obvious in the meeting that was held on September 25th, residents in the area of the proposed hub feel very uncertain about the details of this hub. Originally it was intended to house women transitioning to more permanent housing. Now it is possibly going to be used for respite and short term housing. Furthermore, the opening timeframe for this hub was intended to be May, 2024 however the timeline has changed to rush a possible opening before the end of 2023. As you can see, decisions for this location have changed often and this, as you can imagine, leaves area residents uneasy and feeling ironically insecure about the future of their neighbourhood. I request that council table any further decisions regarding this location until area residents have ample time to both understand the updated role of this hub and to allow for public consultation with regard to the changes that have recently been unilaterally made.

4. The existing business at 705 Fanshawe Park Road houses The Black Pearl Pub. This is a thriving business that has been at this location for decades. As was mentioned in the Community Engagement Results, published July 14th, 2023, Section 3.0, Criteria For Where Hubs Should Not Be Located, residents clearly responded, "Hubs should be away from where they may have a negative impact on

business operations." As you are aware, the proposed hub at this location will cause the forced and unanticipated closing of this business. It is short-sighted and, quite frankly, unfair of the city to cause a family-owned, local business to close or relocate (at great expense to the business owner). In the Hubs Presentation Slide dated August 30th - September 7th, one of the slides posed the question, "Why is this moving so fast?" One of the reasons given was, "businesses are closing". How is it that the city recognizes that businesses are closing but sees fit to force the closing of a business to meet the city's goals? Why is the city allowing yet another business to close as a casualty of this process? London's unemployment rate is 5.6% and it seems council is not concerned with driving that number up as more and more hubs are opened.

5. During the pandemic many of London's homeless were placed in hotels at a considerable cost to taxpayers. Does the city have any analytical data on how this measure alleviated the homelessness crisis? Were those individuals housed in hotels able to move on to more permanent housing? Were any of those individuals who might have been addicted and receiving help while living in, what could be considered transitional, housing successful in overcoming addiction and finding permanent housing and employment? One would think it prudent of the city to have data to follow the success or failure of those measures implemented during the pandemic since public funds were used to house these individuals. If there was no data collected, how can the public be assured that city will be collecting proper and complete empirical data thus measuring the success or failure of this plan so that the plan can be expanded or rolled back?

Mr. Mayor, I ask you to take into account my concerns and the concerns of my neighbours and community at large. I trust that you will represent your constituents in a proportionate and equitable manner.

This is not a matter of not in my backyard situation for me, this is a that location does not meet the guidelines that we're put in place.

Thank you,

Sagan Brown
