Chair and Members
Corporate Services Committee

Re: Participation at Committee Meetings via Technology

As a result of a recent request from a member of the public to speak to the Town and Gown Committee via Skype, I am requesting that the Civic Administration be requested to investigate how members of the public could be provided with the opportunity to speak to Committees of Council using advanced technology (i.e. Skype).

This will require amendments to be made to the Procedure By-law and the Civic Administration to investigate how this could be incorporated into technology already in place.

Respectfully submitted,

Joe Swan
Councillor, Ward 3
