

2023 BioBlitz

Presented by: The Ecology Department at The City of London

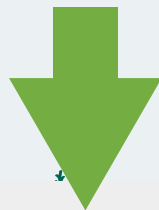

What Is It ?

Come help support the creation of: **London's Environmentally Significant Areas (ESAs) Phase 1 Conservation Master Plan (CMP)**

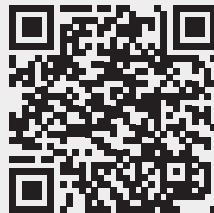

When can you help ?

You can participate in data collection through **October 16-22, 2023**

Download iNaturalist

Scan the QR Code for your device

Once signed up, go to the Projects tab and look for and join the "London ESA Phase 1 CMP 2023"

Go to the participating ESAs and start looking

Stay on-trail and follow all ESA rules

Look for: Plants, Animals, Fungi, Insects or evidence of them.

Document and Photograph anything you find. Photos are the best tool to help us.

Upload and Share your data.

Get back out there!

Data will be reviewed by the project team and City Ecologists for inclusion into the upcoming reports in 2024.

Participating ESAs

Scan the QR Code for one of the **Environmentally Significant Areas** to learn more about it.

Lower Dingman ESA - located in southwest London, a rural setting in the city - The publicly owned lands cover 20 hectares.

Kains Woods ESA - located in the west end of London along the Thames - The publicly owned lands cover 28 hectares.

Warbler Woods ESA - a natural corridor that connects to Kains Woods - The publicly owned lands cover 40 hectares.

Pottersburg Creek ESA - located in east London along the multi-use trail - The publicly owned lands cover 14.4 hectares.
