Planned Development

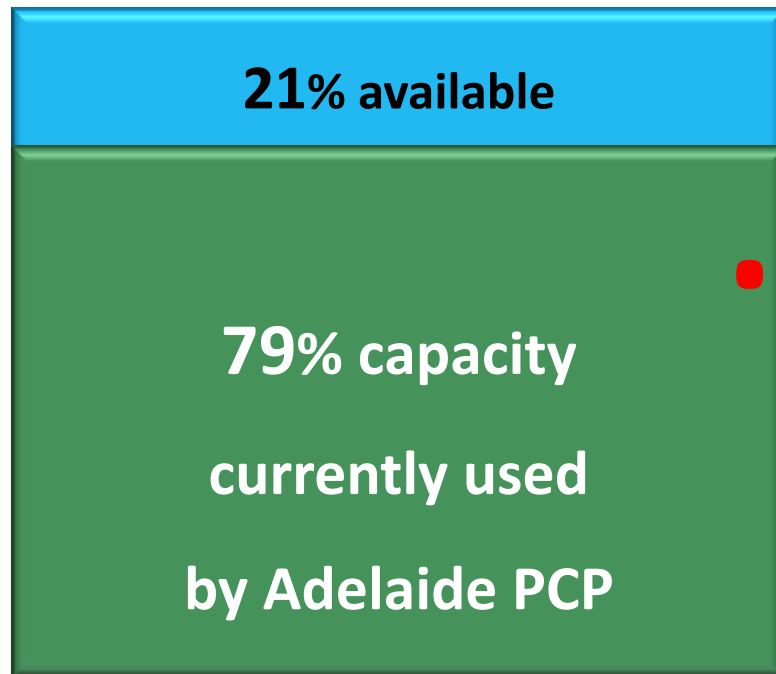

Current Use Stats

Allowed limit 175 (m³/day)
based on 2 month rolling average

Average flow recorded from Arva Pumping Station - 2009/10/11/12
Range 93-116 (m³/day)

Adelaide Pollution Control Plant Capacity

City of London numbers indicate the Adelaide PCP operates at 79% of its capacity.

Current numbers from the Arva Pumping Station illustrate that facility contributes less than $\frac{1}{2}$ a percent of the wastewater now treated at the Adelaide PCP.

Middlesex Centre Official Plan

Middlesex Centre will manage the rate of development in Arva in accordance with its approved Official Plan.

Flow capacity cap allowed in the amended agreement will manage planning numbers.
