

Committee: **Environmental and Ecological Planning Advisory Committee**

Organization/Sector represented:

Name: **Nathaniel Bergman**

Address:

**3a 192 Huron St.
London**

Occupation: **PhD Candidate**

Work experience: **I have 8 years of experience in the private market. My last role was chief geologist of a large geo-engineering consulting company. I specialize in various natural and human-related issues such as flooding and soil erosion processes.**

Education: **I have an undergrad in political science and geography. My masters is in fluvial (river) geomorphology. I am currently in the last year (4th) of a PhD program at Western.**

Skills: **I have strong skills in environmental assessment, engineering design and ability to solve a variety of environmental problems.**

Interest reason: **I live in the city for 3 years now and would like to influence issues that are related to my expertise.**

Contributions: **I can influence issues related to conflict between nature and humans and how these can be reduced or solved before they even materialize.**

Past contributions: **I have worked for the national park service in Israel for 10 years (voluntarily) and have been serving in a task committee appointed by the American Society of Civil Engineers (ASCE) since 2009 to address dam-break flooding.**

Interpersonal: **I have been working with a variety of groups that complement my skills - engineers, biologists, geologists and human geographers so I believe in a holistic view rather than tackling a problem from a very narrow professional perspective.**

Interview interest: **Yes**
