att: London Council

Re: 51 Chesterfield Ave London

I am requesting council to investigate my water bills. When council adopted the new water rate policies it was never communicated that they could increase by 100%. I recently spoke to Mr Usher he stated he understood increase of 7% and suggested I write to council. I have a 12 unit apartment building in which my water bill has doubled, it would be equivalent to a 23% tax increase. I now feel as thou the city has come thru the back door. If this billing policy remains I only have two choices first to increase rent, however the majority of my tenants are on social assistance, I am sure they are not able to handle such an increase. Second option would be to put in a private well. I am hoping council will resolve this matter. I looking forward to hearing from you as soon as possible.

Thank You
