Subject: [EXTERNAL] In Support of fare-free transit on World Car Free Day

Please include this communication in the agenda for next week's meeting.

I am writing in support of the proposal to implement a Fare-free Day to coincide with International Car Free Day 2024 on September 22nd.

With our newly set mode share target, it is imperative that we fund initiatives such as this that can demonstrate to the average Londoner how multi-modal transportation can fit within and enhance their transportation options. Experiencing various modes of transportation at low risk and cost through an event such as Car Free Day will help us meet and ideally exceed our target.

The Bicycle Café will support this event through our communication network as well as participate as a partner in demonstrating how the bike and bus combination is a cost effective and climate friendly option for a good portion of Londoners.

Let's roll!

Regards -

Andrew McClenaghan
