Subject: [EXTERNAL] Car Free Day Support

Dear City Council,

I was excited to read about the planning for Car Free Day this year and to learn about the proposal for free public transit to encourage participation. In addition to giving residents a means to be "car free" it will help introduce - or reintroduce - Londoners to the value of using public transit.

We've seen examples in other places around the world and across this country that make it easier for people to choose alternative means of transportation. And we also know that many folks don't have access to personal vehicles or would prefer to use transportation options that are healthier for the environment, the pocketbook and the body!

Your leadership in supporting the motion at SPCC for a Fare Free Day underscores your vision that "London is a sustainable city within a thriving region, committed to culture, innovation and providing a safe, affordable, welcoming, and healthy future for today and for the next generation."

I give my permission for this communication to be added to the agenda.

Thank you,
Laura Wall
