Subject: [EXTERNAL] Model of care/drug addiction

Please add this submission to the sixth meeting of the shift strategic priorities, and policy committee

Dear members of the SPPC,

I live and work with an easy walk of Dundas in Richmond streets where every day I see what it appears to be a growing population of people who are suffering in all the ways that human beings can suffer, due to drug addiction. It's clear that we haven't found strategies and resources that can turn individual lives and this situation around, and that the province is not adequately responding to municipalities concerns and needs.

I support Councillor Ferriera's motion that his letter be endorsed and forwarded to the Ontario ministry of health and that the mayor be requested to formally advocate to the province with respects to items, i,i,iii.

Regards,

Sylvia curtis-Norcross
