

Report to the Council of The Corporation of the City of London

To: The Council of The Corporation of the City of London

From: Kelly Scherr, P. Eng., MBA, FEC, Deputy City Manager,
Environment and Infrastructure

Subject: Expropriation of Land to Facilitate Placing Certificate of
Requirement of Title - Condition of Amended ECA for Expanded
W12A Landfill – Report 2

Date: April 28, 2026

Recommendation

That, on the recommendation of the Deputy City Manager, Environment and Infrastructure, with the concurrence of the Director, Climate Change, Environment & Waste Management, and on the advice of the Director, Realty Services, with regard to the expropriation of land as may be required to comply with Condition 18 of the Amended Environmental Compliance Approval (ECA) for the Expanded W12A Landfill, and that the following actions be taken in connection therewith:

- a) the Council of The Corporation of the City of London as Approving Authority pursuant to the *Expropriations Act, R.S.O. 1990, c. E.26*, as amended, **HEREBY APPROVES** the proposed expropriation of lands, as described in Schedule A attached hereto, in the City of London, County of Middlesex, it being noted that the reasons for making this decision are as follows:
 - i) the subject lands are required by The Corporation of the City of London for the administrative title cleanup associated with the Expanded W12A Landfill;
- b) subject to the approval of (a) above, a certificate of approval **BE ISSUED** by the City Clerk on behalf of the Approving Authority in the prescribed form.

Executive Summary

The purpose of this report is to seek Municipal Council approval for the expropriation of a small parcel of land required by The Corporation of the City of London to comply with Condition 18 of the Amended ECA for the Expanded W12A Landfill.

This administrative title cleanup involves a single nominal parcel (Part 3 on Plan 33R-1297) that must be acquired to enable registration of the required Certificate of Requirement of Title. Efforts to locate heirs for a voluntary transfer were pursued as a priority; one heir was identified but lacks capacity to act on behalf of the estate. As such, expropriation is the last resort to ensure compliance with the ECA.

Linkage to the Corporate Strategic Plan

The following report supports the City of London's 2023-2027 Strategic Plan through the Climate Action and Sustainable Growth pillar, particularly Outcome 1: London has a strong and healthy environment (Goal 1.1: Moving towards a circular economy by reducing waste and diverting materials from landfill) and Outcome 3: London's infrastructure and systems are built, maintained, and operated to meet long-term community needs (Goal 3.2: Sustainable infrastructure development with a focus on environmental sustainability and climate resilience). By ensuring regulatory compliance with the Amended ECA for the Expanded W12A Landfill, this administrative title cleanup facilitates effective waste management, promotes a circular economy, and supports environmental protection for sustainable growth in London.

Analysis

1.0 Background Information

1.1 Previous Reports Related to this Matter

- Corporate Services Committee – January 12, 2026 - Expropriation of Land to Facilitate Placing Certificate of Requirement of Title - Condition of Amended ECA for Expanded W12A Landfill
- Civic Works Committee – January 11, 2022 - Environmental Assessment Study Report (EASR) – Environmental Assessment of the Proposed W12A Landfill Expansion

2.0 Discussion and Considerations

2.1 Background

The Expanded W12A Landfill is a key waste management facility supporting the City's long-term sustainability goals. The project received an Amended ECA from the Ministry of the Environment, Conservation and Parks (MECP), which includes Condition 18 requiring the registration of a Certificate of Requirement of Title on the lands comprising the site boundary.

A title search confirms that the City does not own the portion described as PIN 08205-0005 (LT), being Part 3 on Plan 33R-1297. The parcel was never transferred to the City and has remained in the estate Stanley Paul Johnston since the original transfer date in 1962. The registered owner is believed to be deceased. Efforts to secure a voluntary transfer through identified heirs were unsuccessful, as the heir lacks the legal capacity to act on behalf of the estate. To ensure timely compliance with the ECA, expropriation is recommended as the appropriate next step. This is the first of three reports addressing this administrative title cleanup.

2.2 Property Details

The required parcel represents a nominal area necessary to complete the administrative title cleanup. Realty Services conducted a comprehensive title search and review, confirming that the parcel is registered to a deceased owner. One heir was identified; however, she lacks the legal capacity to act on behalf of the estate. As efforts to secure a voluntary transfer have been unsuccessful, expropriation will proceed to ensure title correction and compliance with regulatory requirements. A copy of the title search is available from Realty Services.

Location map and legal description of the required property are included as Schedule A.

3.0 Financial Implications and Considerations

3.1 Compensation for Land Acquisition

There is budget available for land acquisition costs relating to this administrative title cleanup.

Conclusion

Compliance with ECA Condition 18 is required to support operations at the Expanded W12A Landfill. Acquisition of this parcel must be secured to register the Certificate of Requirement of Title.

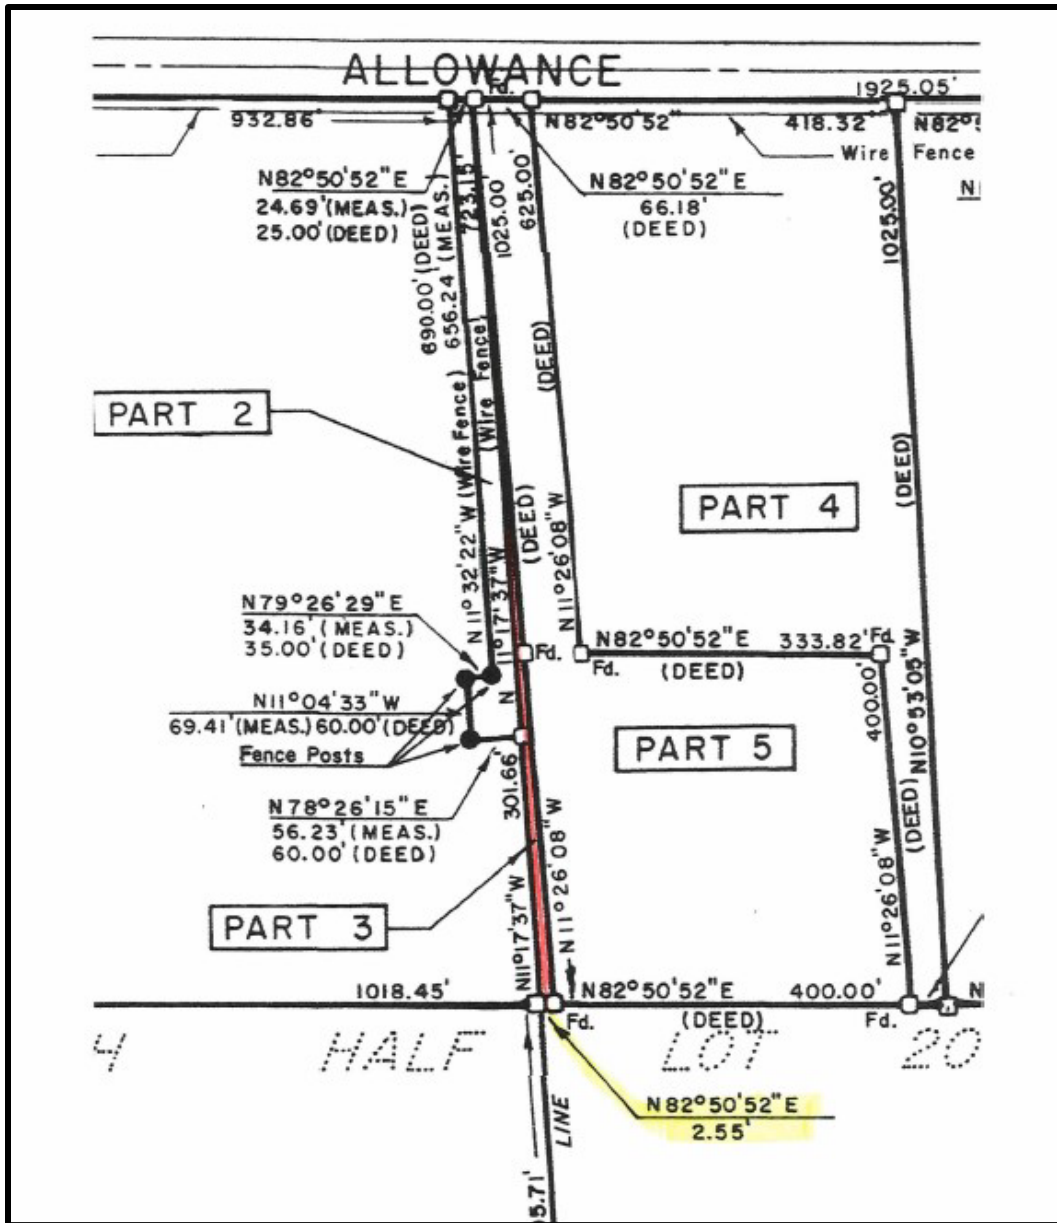

Commencement of the expropriation process is recommended at this time to ensure regulatory timelines are achieved, as prior efforts to locate heirs for a voluntary resolution were unsuccessful due to the identified heir's lack of capacity.
