

Please add my support for the following proposals to the agenda when council meets to discuss mitigation of the result of provincial changes to collection:

1) that recycling services for non-eligible sources an Enviro Depots be implemented ASAP so that recycling from small businesses and non-profits will be properly directed instead of sent to landfills.

2) that Green Bin collection from small businesses and non-profits on Curbside Collection routes be implemented to ensure that compostable garbage is directed appropriately instead of to landfills.

Sincerely,

Inge Stahl
