Subject: spam legislation

Can we have an update at council on the proposed spam legislation and its impact on city council members and city staff operations

David Canton at Harrison Pensa (full disclosure: a Board member at Orchestra London) and an expert in the information field has been hosting community events and seminars (Pillar not for Profit) on the topic and it has sparked my interest on what if any impacts will it have on how city councillors use email and what of the email notices we send as staff re planning applications? Recreation programs, etc

Can we get an update at Corporate Services and Council please

Joe
