Chair and Members  
Planning and Environment Committee

**Re: Strategies for Reducing Bird Deaths as a Result of High-rise Developments**

During the review of the exciting new tower application for the corner of Fullerton and Talbot a short discussion occurred on migratory birds. I request the committee direct staff to consider the following report and references to other Cities and to report back on guidelines that may be included with applications for buildings over a certain height in the City. The following report was prepared for this request by Spencer Sandor, Councillors Contract Assistant.

Respectfully,

Judy Bryant

Attch.
