SCHEDULE B – THE PROJECT

B.1 Project Description

Objective

The objective of the Project is to ensure a high quality and sustainable regional water supply system. The anticipated long-term benefits of the Huron Elgin London Project are:

- a. A sustainable water supply for the region with capacity to facilitate future growth and the assurance of effectively treated water for all connected communities;
- b. A reduced regional reliance on ground water well supply sources, many of which have variable or poor water quality and limited capacity;
- c. Built-in operational redundancy through emergency backup power that will lead to enhanced water supply reliability and resilience; and
- d. Emergency storage and system balancing through the development of a key reservoir and pump station facility.

Boundaries

The Project spans 14 municipalities and approximately 500,000 people in the City of London and the surrounding region served by the Lake Huron and Elgin Area water supply systems in southern Ontario.

Output

Southeast Reservoir

The Southeast Reservoir will increase the capacity of the drinking water and pumping capabilities to the distribution network and back-feed by constructing a reservoir having a storage capacity of at least 114 million litres and associated pumping systems. Existing pumps will also be replaced to accommodate the construction of the new reservoir as well as the installation and replacement of controls between the City of London's supply and pressure zones.

Timeline: February 2009 – December 2014

Lake Huron Emergency Backup Generators

The work includes increasing the power generation to the site and the installation of backup generators and building modifications.

Timeline: June 2009 – August 2013

Lake Huron Residue Management Facility

Work includes the construction of a residue management facility to handle waste by-products associated with the water treatment facilities.

Timeline: June 2009 – June 2014

Lake Huron Fibre Optic Monitoring System

Work includes the installation of a fibre optic monitoring system in approximately 62 km of pipeline.

Timeline: January 2014 – March 2016

Lake Huron Twinning

Approximately 8 km of pipeline main will be twinned, with associated appurtenances and applicable transmission modifications.

Timeline: June 2009 – March 2016

Elgin Residue Management Facility

Construct a residue management facility to handle the waste by-products associated with water treatment facilities.

Timeline: March 2009 – June 2016

Elgin Filtration System Replacement

Replace the existing water treatment filtration systems with a new efficient and higher capacity system.

Timeline: January 2014 – March 2016

Elgin Twinning

Twin approximately 18 km of pipeline main with higher capacity transmission main.

Timeline: September 2009 – October 2013

F.2 GUIDING PRINCIPLE

The key guiding principle in the conduct of communications activities for the Building Canada Fund – Major Infrastructure Component is to inform Canadians, in a spirit of cooperation between the Parties about initiatives to help improve their quality of life. The purpose of these activities, to be undertaken jointly by the Parties and other contributors where appropriate, is to provide greater opportunities for open, transparent, effective, and proactive communications with Canadians by conveying information to the public on the basis of a well-planned, appropriate, continuous, and consistent approach. The activities should recognize the funding of all contributors and communicate to Canadians the benefits of the Project.

F.3 COMMUNICATING WITH THE PUBLIC

In keeping with the main guiding principle, the Parties may issue joint news releases and hold public events after signing the Agreement or completing important Project components. In a spirit of cooperation, the Parties will work together on planning such announcements and preparing materials that ensure all Parties receive equal prominence.

Project news releases will include quotes whenever possible from the designated representatives of the Parties. Public events can be held at the request of one or more Parties.

The Parties agree that all joint communications products produced pursuant to this Agreement will comply with the Federal Identity Program (FIP) and the *Official Languages Act* of Canada.
