

## PUBLIC PARTICIPATION MEETING COMMENTS

### 13. Hyde Park Industrial Area (O-8340)

- Adam Kapinsky, 1217 Gainsborough Road – advising that the property that he believes is being referred to, he thinks the address is 1215 Gainsborough Road; expressing concern with the application as they have a shallow well on the eastern perimeter of their property; expressing concern that, if the usage is changed on that property, to include outdoor storage, and perhaps modification to the access roads, those could technically start interfering with their water supply; indicating that, if this property is going to be included, they would like to have some input on the provisions that are going to be put in place to ensure that their water supply is not affected; further expressing concern with potential noise levels, as there has apparently been some discussion of the rear of that property being used for storage of, or the use of, school buses; expressing concern about the noise level of the reversing buses; also expressing concern with possible groundwater contamination from salt getting into the groundwater, particularly for their water supply; advising that they are aware of the zoning of the property beside them; noting that they have talked to city staff, who informed them that because of the nature of the zoning currently in place, they do not have zoning without a zoning amendment to store buses there.
