

**Kallie Miller, 925 Lawson Road, Ward 7, Matt Brown**

**Good Evening Councillors.**

**Albert Laubengayer, Ph.D. Professor of Chemistry Cornell University said: "Our citizens are being overdosed on fluoride. Fluorine is the most reactive and dangerous of all the halogen family of elements."**

**Dean Burk, Chief Chemist at the U.S. National Cancer Institute for 34 years said: "I know of absolutely no means of prevention that would save so many lives as simply to stop fluoridation of our water supply. In fact, fluoride causes more cancer deaths, and causes it faster than any other chemical." –**

The city of London mass medicates us with a toxic waste version of fluoride with no dose control, no informed consent and no regulation. The more water you drink, the more fluoride you get. As a registered nurse I know this is something not even a physician can legally do. Imagine no toxicology studies or clinical trials! That should be enough to scare even the most fluoridated brain.

Who is monitoring fluoride levels in the population to make sure the toxic waste which is the tooth medicine in our drinking water, is not overloading our bodies along with the immense amount of fluoride in our environment? Are the public policy pushers who promote fluoridation, aware that there are no toxicology studies or clinical trials on the long term use of this hydrofluorosilicic acid? We are told to respect authority. In my humble opinion this is bad advice in this case. Please do your own due diligence and you will find a much different story when no one is paid to promote the public policy for financial or professional gain.

Upton Sinclair once said "It is hard to get a man to understand when his salary depends on his not understanding."

We are being overdosed with fluoride. Few citizens know how much fluoride is in our environment. Unless you eat organically, you are bombarded with the fluoridated pesticides on your vegetables, fruit, fruit juices, and 2% milk to name some of the fluoride sources. Mechanically de-boned chicken is full of fluoride. A can of Diet coke or Pepsi contains 1.12 mg/L of fluoride; Black tea contains 7.8 mg F per cup. Heavy Labatt beer drinkers will ingest 4 mg of fluoride in an evening. Our cereals contain large amounts of fluorides from pesticides on the grains plus the London tooth medicine used in production. When you have a nice soaky bath, your warm open skin, the largest organ, in your body is sucking in immense amounts of fluoride. When you shower not only does your body absorb the fluoride, you inhale the vaporized chemical. Prozac, Lipitor, antibiotics, anesthetics and many other products are all fluoridated. We need the fluoride waste taken out of our life-giving water. We need to stop harming our citizens and our pet's health. Yes. It harms our pet's health just as it does ours.

In October, 2011, Dieppe NB voted to retain fluoridation and on December 12, 2011 reversed that decision. Councillor Dave Maltais said the decision was based on his extensive research of around 20 hours. He said, "You must do your own reading and video viewing. If you don't really look at the documentation closely, you won't be convinced. I had no idea what fluoridation of water was. But I can tell you that I know a lot now, and I know all the harm it can do to the human body. We voted it out of our water. "

I implore the mayor and the councillors to do their own investigation. You are the only ones responsible for the toxic waste in our water, not Health Canada or the Medical Officers of health. They only recommend. Please turn off the tap tomorrow then take time to do your research and find the toxicology studies and clinical trials on hydrofluorosilicic acid for long term use. I say that you will find none. You will save your citizens from much harm. We will gain geniuses and the rate of cavities will go down with hundreds of thousands of tax dollars saved each year as well. The number of persons and pets with serious illness will drop when we stop forcing our citizens to take a toxic, unsafe, medication in their drinking water.

We want safety and choice, not faith and force. Safe Water London members are not going away until we know our precious drinking water is safe and clean and a joy to drink again.

Winston Churchill said:

The truth is incontrovertible. Malice may attack it, and ignorance deride it, but in the end; there it is. –

**Dr. Joseph Mercola, DO who has one of the largest health newsletters on the internet says fluoridation is the greatest fraud ever perpetrated on humanity. From my reading, I agree.**
