Subject: RE: Info-Tech Flag Pole Banners

Hi Laurie,

I would like to congratulate your organization for their achievements and glad to help display that to the public. I have a few requests regarding the installation. Please have the brackets holding the banner attached by lag or screw and not drilling through our poles, that the flag maintains proper clearance from traffic and let me know your timeline for their removal.

One last point for you to note that because the signs are your property, any damage resulting to or by these flag pole banners will be your company's responsibility to repair.

If you accept these requests, I'm glad to grant permission for the installation of the banners.

Thanks,

Brad Wildfong

Subject: Info-Tech Flag Pole Banners

Hello Brad

Thank you so much for taking the time to speak with me today. We really appreciate you allowing our organization to post flag pole banners on the hydro poles along our property line on Queens and Adelaide.

Have a wonderful day.

Warm regards,
Laurie
