Attention: Donna Szpakowski , President

Re: Installation of Traffic Control Measures at Hyde Park and South Carriage

Dear Ms. Szpakowski,

On behalf of The Tricar Group please accept this letter as our support for the installation of traffic lights, in conjunction with the construction work currently underway, at the corner of Hyde Park and South Carriage Road.

While the City of London Transport Planning Department is adamant in their belief that traffic patterns as tested do not meet the minimum standards for a warrant as set by the Province, we would argue that these are minimum standards and as such should be set aside in this case in the interest of public safety.

The Tricar Group fully supports all efforts by the HPBA to introduce an emergency proposal to the City of London Civic Works Committee to recommend to City Council to direct staff to, in the interest of public interest and safety, immediately take steps to install a permanent traffic light at the corner of Hyde Park and South Carriage Roads. Failing this, we would certainly support any suitable stop-gap measures you may be able to negotiate such as temporary lights and/or a pedestrian crosswalk.

As we have a vested interest in the Northcliff development, are members of HPBA, and most importantly, are concerned for the welfare/safety of all persons residing in this area, we support your efforts to making this happen.

Regards,
THE TRICAR GROUP

Adam Carapella
VP Operations
