

A few years ago we had a lead issue
in some areas with our drinking water.
Fluorosilicates increase lead levels in
drinking water from old pipes leading to
increased levels of lead in blood.
You are being asked to decide
a scientific issue here. I ask
you to keep this in mind. Health
Canada has never conducted a study
into the effects of mass medications
people with Fluorosilicates. All I am
asking is that the City of London
stop this practice until one is
(omitted)

When Considering This Matter

I Ask You to Remember Dr's Oath
