

"The American Medical Association is NOT prepared to state that no harm will be done to any person by water fluoridation. The AMA has not carried out any research work, either long-term or short-term, regarding the possibility of any side effects." - **Dr. Flanagan, Assistant Director of Environmental Health, American Medical Association.**

"I am appalled at the prospect of using water as a vehicle for drugs. Fluoride is a corrosive poison that will produce serious effects on a long range basis. Any attempt to use water this way is deplorable." - **Dr. Charles Gordon Heyd, Past President of the American Medical Association.**

"In point of fact, fluoride causes more human cancer deaths, and causes it faster, than any other chemical."—**Dean Burke, Former Chief Chemist ~~EMPHASIS~~, US National Cancer Institute.**

It is concluded that artificial fluoridation appears to cause or induce about 20-30 excess cancer deaths for every 100,000 persons exposed per year after about 15-20 years."—**Dean Burke**

Dr. John Yiamouyiannis states that from 30,000-50,000 deaths/year are directly traceable to fluoridation; 10,000-20,000 of these deaths being from fluoride induced cancers.

"fluoridation ... it is the greatest fraud that has ever been perpetrated and it has been perpetrated on more people than any other fraud has." - **Dr. Professor Albert Schatz, (Microbiology), co-discoverer of Streptomycin, the cure for tuberculosis and numerous other bacterial infections.**

"It is now clear that fluoride is a potentially harmful substance when present in the drinking water in any amount." **Dr. Simon Beisler, Chief of Urology, Roosevelt Hospital and Past President of the American Urological Association.**

"E.P.A. should act immediately to protect the public, not just on the cancer data, but on the evidence of bone fractures, arthritis, mutagenicity and other effects." - **Dr. William Marcus, Senior Toxicologist at E.P.A.**

"..significant increase in the risk of hip fracture in both men and women exposed to artificial fluoridation at 1 ppm."
Journal of the American Medical Association, August 1992

"We would not purposely add arsenic to the water supply. And we would not purposely add lead. But we do add fluoride. The fact is that fluoride is more toxic than lead and just slightly less toxic than arsenic." —**Dr. John Yiamouyianni**

"Fluoridation is the greatest case of scientific fraud of this century, if not of all time."—**Robert Carton, Ph.D. former US EPA scientist.**

"Fluoride is more toxic than Lead and only marginally less toxic than Arsenic." —**Clinical Toxicology of Commercial products**, 5th Ed. 1984
