

Subject: FW: Palace Theatre

Dear Ms Saunders

I realize that we are far too late to get an application into the Capital Grants funding program but I would like to put our request on the agenda for the budget just in case something becomes available. We rarely go to the City for funding for these issues and we have recently been working towards raising \$150,000 for the new roof required by the theatre. We discovered late in the process of replacing the roof that the damage to the interior walls of the building was being caused by a condensation issue that can only be solved by the application of specialty siding. This siding costs and repairs to the plaster inside the theatre are estimated at up to \$100,000 monies that we just don't have access to.

We would really appreciate any advice or assistance that the City can lend us, or if remotely possible access to some capital funding.

Regards

Faith
