Sarnia/Lambton	\$50,000 per acre
St. Thomas	\$35,000 per acre
Stratford	\$75,000 per acre
Strathroy	\$35,000 per acre
Windsor	\$65,000 per acre
Woodstock	\$70,000 per acre

Within London, the industrial land market has the following characteristics:

- Two-tiered, with lands serviced and sold by the City of London for industrial users constituting the first tier and lands sold by the private sector for a similar purpose forming the second tier.
- As the City is the primary supplier of large serviced lots for industrial use, it has a major influence on market pricing for this type of land.
- Major market predictors of the price for industrial land in London include:
 - availability and capacity of services
 - amount of and cost of site works needed to prepare (primarily grading) a parcel before building can commence
 - location linkages to transportation infrastructure and other industries
 - legal, regulatory, and physical restraints that govern the development cost and building capacity of any particular site to an end user/buyer.
- Demand for serviced industrial lots over the last several years has been sporadic, consistent with the general economic downturn in Ontario.

SUMMARY OF CURRENT LAND HOLDINGS

Serviced Industrial Parks

PARK	Net Available (Acres)	Net Available (Hectares)
Innovation Park – Phases I to IV	238.76	96.62
Skyway Industrial Park	44.61	18.05
