Growing inward and upward

Shaping our City around rapid transit

Creating a cosmopolitan city -
one that is culturally rich and diverse

Planning for exceptional spaces & places

A group of people are walking and cycling on a path through autumn trees. The path is covered in fallen leaves, and the trees in the background have vibrant yellow and orange foliage. A person in a red shirt is running, and a person in a black shirt is cycling. Two women in black dresses are walking away from the camera on the right.

Giving real & attractive mobility choices -
walking, cycling, transit

A group of people are standing in front of a building, some holding tools. The building has a brick wall on the left and a white door in the center. The people are dressed in casual clothing, and some are holding tools like hammers and saws. The scene suggests a community project or a group of volunteers.

Building strong & healthy
neighbourhoods

Children are playing in a park with autumn leaves. The children are running and playing in a grassy area with many fallen leaves. The trees in the background have vibrant autumn foliage. The scene is bright and sunny, suggesting a pleasant day in a park.

Building one of the greenest cities in
Canada

Planning a smart city -
Connecting London to the World

Regenerating our urban
neighbourhoods & main streets

Building a city to attract talent
& investment

The Smart Moves 2030 Transportation Master Plan focused on enhanced mobility choices in London to create a multi-modal transportation system. The plan sets a 20% mode share target for public transit, up from 12.5% today.

Objectives for Rapid Transit

- Cities build rapid transit to achieve many objectives – economic growth, mobility, community building
- The prioritization of these objectives can, and should, influence the design of rapid transit

What is Rapid Transit?

- ***Means the movement of many people, at the same time, and at higher speeds using vehicles such as buses or trains***
 - vehicles operating on designated rights of way
 - queue jump lanes at key intersections to allow transit vehicles to get ahead of traffic
 - high capacity vehicles
 - high frequency service
 - traffic signal priority at intersections to assist transit vehicles in maintaining their schedule
 - quality passenger amenities including enhanced stations, real time information and automated fare purchase stations
