Subject: Tricar at Talbot

Dear Councillor Hubert and Committee,

This is a disappointing application; no embellishment or even understanding of the public realm. This is just another Renaissance building that contributes nothing beyond numbers. Talbot tower is in such a pivotal location where vestiges of grander residents merge with new. This building is a currently a suburban type and works like a snout house (not my words but it says what must be rectified) all parking on six lower floors no eyes on the streets at such a critical juncture in our city. This juncture in the core desperately needs eyes on the street. There are many ways to do this including incorporating part of the old buildings. Currently this is not good enough for London. We must get each new project right to build City pride and excellent intensification.

Thank you for your attention and please raise the bar. Say no to the current application. Please encourage the applicant to bring an outstanding project.
Judy Bryant
