

# Thames Valley Parkway North Branch Connection Richmond Street to Adelaide Street Class Environmental Assessment Study

## Public Information Centre # 2

The Thames Valley Corridor is London's most important natural, cultural, recreational and aesthetic resource. The river corridor is a complex system of sensitive ecological habitats, intensive public recreation areas and developed urban lands which are all interconnected by a municipal pathway system.

This pathway system, known as the Thames Valley Parkway (TVP) stretches along all three branches of the river and converges in the downtown core. Connecting existing "gaps" in the TVP is a priority for the City. In the fall of 2014 the City initiated a Municipal Class Environmental Assessment (EA) to address the existing gap in the north branch TVP between Richmond Street and Adelaide Street as well as secondary connections to area neighbourhoods. The study reviewed several potential alignments for the TVP, which were presented to the public in January 2015. The study team is

recommending the alignment that includes two pedestrian bridges over the Thames River, connecting to the existing TVP at Ross Park and North London Athletic Fields. Details regarding the evaluation and recommended alignment will be presented at the November 12 Public Information Centre.

### Public Information Centre #2

<b>Date:</b>	Thursday, November 12, 2015
<b>Time:</b>	4:30 – 7:30 p.m.
<b>Location:</b>	Windermere on the Mount, Gymnasium 1486 Richmond Street, London
<b>Format:</b>	Open house/drop-in format with staff available to answer questions

Information collected for the study will be used in accordance with the *Municipal Freedom of Information and Protection of Privacy Act*. With the exception of personal information, such as name, address and property location, all comments received throughout the study will become part of the public record and included in project documentation.
