RE: 186-188 Huron Street and 2 Audrey Avenue, London, Ontario: Amendment to the City's Official Plan and Zoning By-Law

I wish to register my objection to this aforementioned application. I have lived most of my life in this unique north London neighbourhood and as a long time resident (> 60 years) I have watched as this once proud neighbourhood has become a transient, short term stopping ground for Western Students and a cash cow for absent land lords who show little interest in the declining integrity of this neighbourhood. I am a Western Alumni who has supported the university's unique culture and community for many years and in return I have had rotten eggs thrown at my windows, garden statuary stolen from my private back yard and liquor bottles constantly strewn across my yard. For the sake of our neighbourhood please do not to support this application – further concentration of student housing will do nothing to enhance our unique but fragile neighbourhood.

Sincerely,

Marilyn Gregory
