

**RAPID TRANSIT CORRIDORS
ENVIRONMENTAL ASSESSMENT STUDY
NOTICE OF PUBLIC INFORMATION CENTRE #3**

The City of London is entering a new chapter in its history - one that is focused on improving travel options for residents. Rapid Transit is a key part of this new vision, along with reshaping land use. The foundations for Rapid Transit were established through *The London Plan* and *Smart Moves 2030 – A New Mobility Transportation Master Plan*.

The City of London is currently conducting the Rapid Transit Corridors Master Plan study in accordance with the *Municipal Class Environmental Assessment (EA)* process, which is an approved process under the Ontario *Environmental Assessment Act*. The first stage of the study will prepare a Master Plan for Rapid Transit in accordance with Phases 1 and 2 of the Municipal Class EA process.

You are invited to attend the third Public Information Centre (PIC) for the Rapid Transit Master Plan study. The purpose of the PIC is to present the preferred Rapid Transit system including the corridors, vehicle technology and station locations. The session is a drop-in open house, with panels displaying information on the preferred Rapid Transit system, cultural and environmental impacts assessment, and potential impacts along each corridor. Project staff from the City and the consultant team will be available to answer questions and collect your feedback.

**Rapid Transit Corridors EA
Public Information Centre #3**

**Wednesday December 2, 2015
Noon – 8:00 pm**

London Public Library Central Branch
251 Dundas Street, London

Formal presentation and discussion at 6:00 pm
