Chair and Members of
Planning and Environment Committee

Re: Public Engagement Process – Glanworth Neighbourhood

The Glanworth neighbourhood is representative of a unique rural community within the City of London. This uniqueness can be preserved, to the greatest extent possible, through the implementation of planning policies, created in consultation with the neighbourhood through a public engagement process.

As a result, I respectfully request support of the following recommendation:

"The Civic Administration BE DIRECTED to initiate a public engagement process with the Glanworth neighbourhood to receive comment and evaluate potential changes to the Official Plan and Zoning By-law and other relevant policies and regulations that would assist in preserving the quality of life and neighbourhood amenities, recognizing the unique setting of Glanworth within a highly rural setting."

Respectfully submitted,

Jared Zaifman
Councillor Ward 14
