

Folks,

Our family votes to not replace the dam at Springbank Park. It's been so great over the past few years to walk by the river in summer and not have stagnant and stinking water in the river.

As for the bridge there, hire a creative architect to design a semi-enclosed platform on the existing dam platform. include permanent concrete planters large enough to hold and grow trees along both sides of the platform. Have part of the platform canopied . Have many tables and comfortable chairs for viewing the river while having a snack or beverage . Have a small restaurant that operates spring summer and fall. Make it an attraction. Etc Similar has been done in many cities.
