REGINA MUNDI COLLEGE BUILDING RENEWAL STUDY

SEPTEMBER 25, 2013

- Nicholson Sheffield Architects engaged in 2013 to prepare Building Renewal Study for RMC.
- Building Renewal Study identifies items in need of repair or replacement; most significant concern is exterior building cladding components.
- Subsequent structural investigation and study is undertaken in 2014; review indicates exterior cladding (stone veneer and stone panels) is missing structural anchors, uses anchors not appropriate for type of construction, or the anchors have corroded.
