Dear friends

As we all know Uber has affected the lives of thousands of families in north America and other parts of the world. In Canada, there are so many rules and regulations that apply to taxi business including price, age of the cars, safety inspections, police record checks, having a full G license for at least one year, drivers also need a license from the city and a business license for each taxi. According to the law the number of taxis is supposed to be limited in the city

Uber does not have to follow any of those rules but they are allowed to work like a taxi.

If all these rules and laws are made for no reason why should we follow them????????? And if these laws are supposed to protect the customers and the taxi business why shouldn't Uber follow them??

One excuse is that some people prefer to take Uber instead of taxi. If this is the case, some people don't want to pay taxes, and some people want to pass the red light, Why politicians don't pass some laws to allow these people to do so.

There was an article in London Free Press quoting from one of our fellow drivers comparing the situation to a jungle. I don't call it a jungle, I call it Capitalism. In a jungle, even the strongest animals kill other animals to survive. In capitalism everything is for greed, power and money.

There was also an article on internet that Sugar Producing companies mislead people with giving some money to a group of scientists in order to hide the risks and side effects of sugar. Even though these kind of fraudulent acts are not common within the scientists, it is very common in politics and justice system. I absolutely agree with Donald trump that the system is corrupt. But I should say that he is the most corrupt politician in the world.

I am sure that some politicians and judges have some kind of connection with Uber. They have either received some money or some kind of benefit legalizing Uber.

To my belief, if Uber is supposed to operate, they should operate exactly the same as any other taxi fleet. The number of taxis should not be increased; the prices should be exactly the same as the other ones and they should follow all the rules and laws exactly the same as the other taxis.

This will not happen unless we act all together, either a strong protest or find some ways to give some money to politicians and judges.

Thank you very much
