

Advisory Committee on the Environment Energy sub-committee - report

Meeting date/place: Friday, September 2, 2016 @ London Home Builders' Association

In attendance: Tom Arnos, Ken Birchall, Mike Bloxam, Lois Langdon, Diane Szoller

Not in attendance: Thomas Stoiber

The meeting commenced at 16:23.

1. Peterborough green energy

Discussion was had around green energy in Peterborough, with 11 projects encompassing landfills and wastewater treatment.

2. London District Energy

Might be for sale.

3. Hydro power in the Thames

Looking for UTRCA to comment and should be on ACE agenda. Tom could not reach Chief White-Eye.

4. Climate Action Plan

Vehicle electrification, home retrofits, etc.

5. Community Energy Action Plan

"Can't control the price of energy/electricity, but can control the cost."

6. Sustainability officer (#14 on 2016 work plan)

Goes beyond the official plan. Gabor has put together a list of "sustainability" mentions in *The London Plan*, yet there is no definition of sustainability included.

7. Mayor's Sustainable Energy Council

No evidence that the council has met in over two years. What is the status? Lack of MSEC has been noticed. Jay's reporting is missed.

The meeting concluded at 17:19.
