

**NOTICE OF PUBLIC INFORMATION CENTRE #4
RAPID TRANSIT CORRIDORS MASTER PLAN
ENVIRONMENTAL ASSESSMENT STUDY**

The City of London is entering a new chapter in our history - one that is focused on improving travel options for residents. Rapid Transit is a key part of this new vision, along with reshaping land use. The foundations for Rapid Transit were established through *The London Plan* and *Smart Moves 2030 – A New Mobility Transportation Master Plan*.

The City of London is currently conducting the Rapid Transit Corridors Master Plan study in accordance with the *Municipal Class Environmental Assessment* (EA) process, which is an approved process under the Ontario *Environmental Assessment Act*. The first stage of the study will prepare a Master Plan for Rapid Transit in accordance with Phases 1 and 2 of the Municipal Class EA process.

Input Needed on Rapid Transit Master Plan

You are invited to attend the fourth Public Information Centre (PIC) for the Rapid Transit Master Plan study. The purpose of this PIC is to present the preferred rapid transit network solution and supporting strategies, including the preferred corridors and vehicle technology. The event is a drop-in open house. Project staff from the City and the consultant team will be available to answer questions and collect your feedback.

This event will be held with the **Richmond Street Municipal Underground Utilities Realignment** Public Information Centre #1. See the reverse side of this sheet for an invitation to that event.

**Rapid Transit Corridors Master Plan Study
Public Information Centre #4**

Thursday, February 23, 2017

5:00 to 8:00 pm

London Public Library – Central Branch
251 Dundas Street, London

The venue is fully accessible. If you require special accommodation, please contact us at shift@london.ca prior to the event.

Display materials will be posted on the project website, www.shiftlondon.ca. You can also submit comments to shift@london.ca until Friday, March 10, 2017. Previous meeting information is available on the project website.

Edward Soldo, P. Eng.

**NOTICE OF PUBLIC INFORMATION CENTRE
RICHMOND STREET MUNICIPAL UNDERGROUND
UTILITIES REALIGNMENT
ENVIRONMENTAL ASSESSMENT STUDY**

The City of London is undertaking a Municipal Class Environmental Assessment (EA) Study to evaluate and identify alternatives for the realignment of stormwater and sanitary sewers that will be impacted by the proposed Richmond Street Rapid Transit tunnel in Downtown London. The four sewers are the Carling Creek Trunk Storm Sewer, Oxford Street Trunk Sanitary Sewer, Pall Mall Trunk Sanitary Sewer, and the Sanitary Relief Sewer in the vicinity of Pall Mall and Mill Streets. This may require a new outfall to the Thames River.

The study will follow a Schedule 'B' project as outlined in the Municipal Engineers Association (MEA) Municipal Class Environmental Assessment (2000, as amended in 2007, 2011 and 2015). This is an approved process under the Ontario *Environmental Assessment Act*.

Feedback Needed on Sewer Realignment

The City and its consultants will be hosting a Public Information Centre (PIC) for the study. The purpose of this PIC is to present information on the study, including the design alternatives. The event is a drop-in open house. Project staff from the City and the consultant team will be available to answer questions and collect your feedback.

This event will be held with the **Rapid Transit Corridors Master Plan** Public Information Centre #4. See the reverse side of this sheet for an invitation to that event.
