**Subject:** Fw: fluoridation

Betty; Please attach this note to the agenda for Civic Works Committee meeting item #3 for the public record.

In the interest of the health and well-being of the residents of London and for that matter, anywhere else, I would hope that fluoridation of our water will come to an end immediately. When my son was to the dentist, the fluoride that he used on his teeth caused him to be sick for 2 days and he couldn't go to work which was lost income to him as he is self-employed. Doesn't that tell you something?
