**Subject:** FW: fluoridation

---

Betty. Please attach this to the agenda for the Civic Works Committee on April 23, 2012 #3, Fluoridation for the public record.

I have followed with interest the many debates on fluoridation of city water supplies. Many parts of Europe and cities in Canada and the USA do not fluoridate their water due to the uncertainty of the overall health consequences. I support the cessation of fluoridation in London until there are reliable scientific studies to prove there is no harm to our health with this wholesale medication. There is fluoride in my toothpaste so I don't also need it in my kidneys.
