Trees and Forests Advisory Committee Advisory Committee Work Plan – 2017

Meeting schedule: In order to keep momentum, TFAC will meet early in December to avoid conflict with the holidays.

Project/Initiative	Background	Lead/Responsibility	Proposed Timeline	Proposed Budget	Link to Strategic Plan	7	Formatted Table
Urban Forest Strategy <u>:</u> General	 The Urban Forest Strategy is a multi-million dollar 20 year strategy to help ensure the growth and health of one of the Forest City's most important features. Providing advice on the formation and implementation of London's Urban Forest Strategy is at the core of TFAC's mandate. Monitor progress on the Urban Forest Strategy and make recommendations concerning its ongoing implementation 	Amber & Roberto	Ongoing	\$0	Robust Infrastructure 1A: Address and manage the infrastructure gap to maintain what we have now and reduce the tax burden on future generations. Strong and Healthy Environment 3C: Plant more trees and better protect them from deforestation, invasive species, and other threats.		
	—Ensure PEC is being kept informed of progress on the UFS •				Strong and Healthy Environment 3E: Work together to protect all aspects of		Formatted: Indent: Left: 0", Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Tree Planting Guidelines	 This document determines what species can be planted and where on City land, and is updated on an annual basis TFAC will review and make suggestions for improvement this year, particularly with regard to invasive species, climate change, and allergens, and seek to more strongly connect it to the Urban Forest Strategy These were submitted to the City in March, 2016. Update – Recommendations Changes submitted for review These are supposed to get done this February (2017): ask Rick Postma for update, continue to follow progress on these items. 	Working group	May - September	\$0	Strong and Healthy Environment 3C	
Committee Development	Identify potential educational/outreach opportunities for members to possibly attend to help keep abreast of current developments in urban forestry (e.g., forestry conferences) and plan to have at least 3 TFAC members attend such opportunities this year.	TFAC	Ongoing	\$500	Innovative and Supportive Organizational Practices 2B: Use innovative and best practices in all organizational and management activities	Formatted: Font: Bold
Companion Plantings for Trees	 Trees often benefit from being planted in association with other native shrubs, wildflowers and grasses. Having additional naturalized land also reduces environmental impacts of land management (e.g., fossil fuel consumption for lawn mowing; stormwater runoff, etc.) and provides habitat for wildlife (e.g., bees and other pollinators). TFAC will research opportunities for this to occur on City- 	Patti	July - December	\$0	Strong and Healthy Environment 3C	
	owned land.					Formatted: Font: Times New Roman
	• <u>Feb. 2017: Patti has left committee; if no one wishes to take</u> <u>this on this year, we may wish to remove it in favour of other</u> tasks					Formatted: Font: Italic, Font color: Accent 2 Formatted: Font: Italic
Identification of Publicly Owned Plantable Spaces	 As the largest single landowner in London, the City owns an enormous amount of plantable land, not all of which is in parks. TFAC will work to make recommendations to help ensure that there is a regular process for identifying all plantable 	<u>TBD</u> Amber	2017	\$0	Strong and Healthy Environment 3C	Formatted: Font: Bold
	spaces on City-owned land and that there are systems in place to help get them planted and contributing to London's canopy cover targets.					

	•	Invite James MacKay, Ecologist to a future meeting (2017) to speak to this.					
Project/Initiative		Background	Lead/Responsibility	Proposed Timeline	Proposed Budget	Link to Strategic Plan	
Fruit & Nut Tree Initiatives	•	There is a growing interest in food security issues in London. With climate change, food prices are expected to increase by 11-131% (depending on species) for staples such as corn, rice and wheat by 2050: an increase in food prices of as much as 4% is expected for 2016 alone. TFAC will collaborate with the Agricultural Advisory Committee (AAC) and the Advisory Committee on the Environment (ACE) to explore ways to increase food security through the planting of fruit and nut trees. Feb. 2017: TFAC supported AAC's Urban Agriculture conference last year. Recommendations on this issue this year would probably be pretty short.	Amber (in partnership with Skylar from AAC)	MayFebruar Y	\$0	Caring and Compassionate Services 3A: Eliminate barriers for individuals facing poverty, mental health and addictions and help them find pathways to be successful.	
Phased Planting in	•	TFAC made a recommendation to PEC concerning the idea	Craig	<u>June -</u>		Strong and Healthy Environment 3C	
<u>Unassumed Subdivisions</u>		of doing two phases of plantings in new subdivisions to		<u>November</u>			Formatted: Font: Bold
		speed up planting last year; was supported by PEC					
	•	Andrew has said it should be possible to make progress on this issue this year					
Shade Policy	•	TFAC received presentation and report from UWO environmental health promotion students in 2016, and	Randy	June - December		Strong and Healthy Environment 3C	
		recommend City consider adopting a shade policy that					Formatted: Font: Bold
		would deal with both living and manmade sources of shade on city properties; was supported by PEC. Toronto already					
		has a municipal shade policy in place and could be a great					
		source of inspiration.					
	•	Randy (MLHU) would like to spearhead this this year					
		(Although park/recreational space-focused, Toronto's policy					
		was driven by efforts from their local health unit).					
Invasives Strategy	•	The use of invasive tree species within London's Urban				Strong and Healthy Environment 3E	Formatted: Font: Bold

Make recommendations on how to make planting easier for		
residents (as per council direction to staff in 2015)		

AMC - ADD:

Review Woodland Acquisition Policy

Ensuring largest tree possible planted in boulevards (based on space)

Helping introduce new Urban Forester to what we do / outstanding requests moving forward (esp. climate change, watering options report, tree planting guidelines update, UFS Semi-Annual Update using template) (CITY PLANS TO POST SOMETHING in next couple of weeks for this position)

Boulevard Tree Protection Bylaw - Updates?

Use of consistent climate change scenarios for planning

TVCI AM

Nothing so far

CRAIG:

- Keeping tabs on all of the things we have going b/c not all of them are resolved; UFS is continuing to evolve
- Maybe make a point of a quarterly review of the workplan

Natalie:

None

ANDREW:

- UFS Semi Annual Update Report can and should be brought back to TFAC—they do have a really good summary of the recommendations for tasks along with who should be doing it and an update (can get it to us later this spring_
- Planting Strategy: on track to come back for further input probably to TFAC's FEBRUARY meeting

- Asian Longhorn Beetle Report & Update on current state of affairs in North America (for March)
- Tree Protection By Law has to be reviewed "1 year after approval" (so, Sept. 1 2017 is the end of that year); they'll be taking comments, doing open houses, etc. with report back to PEC in the Fall
 - Craig believes we (our committee) requeted a 6 month update (not an exhaustive review)
 - TFAC SHOULD PLAN TO GET ITS COMMENTS IN RELATIVELY EARLY maybe August/September
- Boulevard Tree Protection Bylaw: has been put on the back burner to implement the main Tree Protection Bylaw. Likely will be December, 2017 that that review will be ready. (May start as early as July for a communication plan)
- New London Plan, UFS, TPS all need to mesh together and look at priorities for imeplementation
 - OP went to province; got 42 appeals and staff in Planning are trying to deal with all that and what it means for planning in London. WE don't yet what, if any of those policies have been appealed.
- Phased planting in unassumed subdivisions
- Invasive Species Strategy (I think he just means the one with the four species)

HIV4.

Would like to see progress on Green Legacy and some updates about it

With tree planting bylaws and strategies: went to a presentation once about forest edges — has wondered about all the strategies and plans — are we putting thoughts into more than just canopy trees, but healthy edges/hedges/shrubs and how they interact

RANDY/DAVID:

Shady Policy a key area of interest to MLHU - they would like to be able to provide input into one

SARA:

How to incent private sector to plant 45,000 trees/year
