**Subject:** I support rapid transit in London!

Good evening.

I'm a Londoner and I support moving forward with a strong rapid transit system.

I am a resident of old north and despite what many people have said not everyone in this area is against rapid transit. I work in an office at the corner of Richmond and Dufferin. What I enjoy most is having option in how I choose to get around the city. I take public transit for most days during the fall and winter months and I often choose to walk or ride a bike when the weather is good.

I own two cars and have made the decision to leave it at home for much of my work commuting. I find driving to be more costly and more time consuming. As a result of my office location Talbot street is the main option for me to get home and on most nights it take 20 minutes or so just to get to Oxford Street from where I would park. It takes half the time on the Bus.

In addition to my own needs I have many staff members who rely on public transportation to get to the office and having rapid transportation would make their lives much easier.

Regards.
