

# Medway Valley Heritage Forest ESA (south) Conservation Master Plan – Phase 2 Review of DRAFT Content

*August 24, 2017*

## Overview of the Phase II CMP

<b>1.0</b>	<b>Introduction</b>
<b>2.0</b>	<b>Phase I Summary of Findings</b>
<b>3.0</b>	<b>Environmental Management Strategy</b>
<b>4.0</b>	<b>Trail Management</b>
<b>5.0</b>	<b>Adaptive Management and Monitoring Framework</b>
<b>6.0</b>	<b>Continued Community Engagement</b>

**Legend:**

- Utility Overlay (4 m)
- MVHF ESA (south) Boundary (Refined as per Phase I)
- Watercourse
- Western/Huron Properties
- Property Boundaries

# REVIEW OF THE CMP PROCESS

## CONSERVATION MASTER PLAN PROCESS

**PHASE 1:** Community Engagement and Participation ✓  
 Life Science Inventory and Evaluation ✓  
 Boundary Delineation ✓  
 Application of Management Zones & Review of Existing Trails✓  
 Identifying Management Issues ✓

**PHASE 2:** Community Engagement and Participation  
 Goals, Objectives, Recommendations  
 Ecological Protection, Enhancement & Restoration  
 Trail Planning & Design Process  
 Priorities for Implementation  
 Final Conservation Master Plan

### Milestones of Phase I CMP Process:

#### Community Information Meetings were held on:

- July 25, 2013 - Project Initiation
- January 27, 2014 – Presentation of Key Findings

#### Phase 1 CMP Report to Planning and Environment Committee of Council

- February 14, 2017
- [Phase 1 CMP](#) and the [Addendum](#) updated with 2016 version of Guidelines for Management Zones and Trails in ESAs - both approved by Council

P.O. Box 5035  
 300 Dufferin Avenue  
 London, ON  
 N6A 4L8

February 15, 2017

J. M. Fleming  
 Managing Director, Planning and City Planner

I hereby certify that the Municipal Council, at its meeting held on February 14 and February 15, 2017 resolved:

4. That, on the recommendation of the Managing Director, Planning and City Planner, the following actions be taken with respect to the Medway Valley Heritage Forest Environmentally Significant Area (south) Conservation Master Plan Phases I and II:
  - a) the Natural Heritage Inventory and Evaluation for the Medway Valley Heritage Forest Environmentally Significant Area (MVHF ESA), forming Phase I of the Conservation Master Plan appended to the staff report dated February 6, 2017 as Appendix 'A', BE APPROVED in accordance with Section 15.3.8. of the Official Plan and policies 1421 and 1422 of The London Plan;
  - b) the Addendum to the Natural Heritage Inventory and Evaluation MVHF ESA, including the existing trail review appended to the staff report dated February 6, 2017 as Appendix 'B', BE APPROVED in accordance with Section 15.3.8. of the Official Plan and policies 1421 and 1422 of The London Plan;
  - c) the Local Advisory Committee BE INCLUDED in the trail planning and discussions relating to environmentally significant areas as appropriate;
  - d) the members of the Environmental and Ecological Planning Advisory Committee, Nature London and the community BE THANKED for their work in the review and comments on the Phase I document; and,
  - e) based on the process within the recently updated Guidelines for Management Zones and Trails in ESAs, Phase II of the Conservation Master Plan for the Medway Valley Heritage Forest Environmentally Significant Area (south) BE INITIATED. (2017-E20) (4/4/PEC)

## Milestones of Phase II CMP Process:

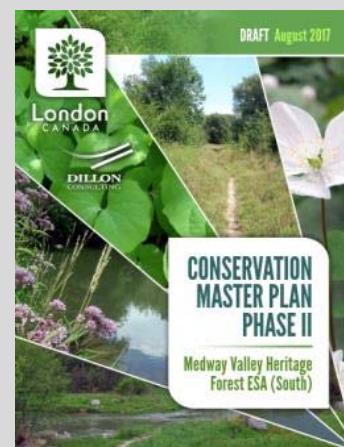

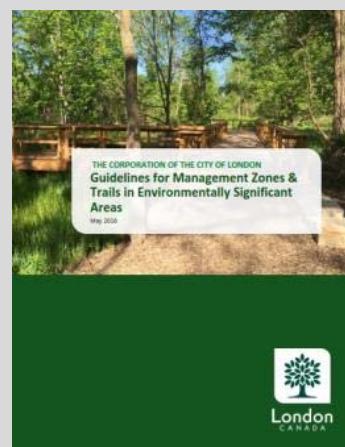

- **March 2017**
  - Formation of the Local Advisory Committee (LAC) and definition of roles circulated
- **LAC Meetings**
  - April 27, May 4 and July 27 (future meetings September 7 and October 5)
- **June 1**
  - Community Open House #1
- **June 1 to June 30**
  - Web mapping tool and survey open to public
- **August 22**
  - Draft distributed for discussion and comment

## GOAL OF MVHF ESA (SOUTH) CMP – PHASE 2

To develop a comprehensive multi-year CMP that presents recommendations for achieving long-term ecological integrity and protection of the ESA through the implementation of an environmental management strategy.

*(Consistent with OP 15.3.8. i, ii, / London Plan policies 1421 and 1422)*

## Implementing the Recommendations

Priority for Implementation	Time Period for Implementation
<b>Top</b>	Start within one year, including items already underway
<b>High</b>	Start within two years
<b>Moderate</b>	Start within three years
<b>Low</b>	Start within four years up to ten years
<b>Long Range</b>	Projects without specified time frames – may occur beyond ten years

## Phase I Summary of Findings

1. All significant ecological features identified in Phase 1 were found to be compatible with the existing managed trails based on Chart 2 from the Guidelines for Management Zones and Trails in ESAs
2. Fifteen areas were identified that require active ecological restoration or special management. **Majority of ecological restoration work is underway in 8 of 15 Restoration Overlays (Figure 2)**
3. Three areas were identified for naturalization (Figure 2)

## Phase I CMP Summary of Findings

**5. Nine wildlife habitat types identified & recommendations provided (in Table 12) for:**

- Colonial-Nesting Bird Breeding Habitat
- Amphibian Breeding Habitat
- Seeps and Springs
- Habitat for Species of Conservation Concern:
  - Shrubby St. John's Wort
  - Striped Cream Violet
  - Slender Satin Grass
  - American Gromwell
  - Green Dragon

False Rue-anemone  
(*Enemion biternatum*) in  
MVHF ESA (Threatened)

**6. Habitat for Threatened or Endangered native species identified:**

- Butternut
- Cucumber Magnolia
- Kentucky Coffee-tree
- False Rue-anemone
- Queensnake
- Spiny Softshell
- SAR bats

Green Dragon (*Arisaema dracontium*) in MVHF ESA (Special Concern)

## Summary of Feedback Received for Phase II

**Source of Feedback/Comment**

**Comments submitted from LAC Members on behalf of:**

- EEPAC
- Nature London
- Orchard Park/Sherwood Forest Ratepayers
- Huron University College
- Sherwood Forest Adopt-an-ESA

**Social PinPoint – Online Mapping**

- 82 Pins/comments
  - 157 sub-comments across these 82 pins

**Community Open House Hard Copy Mapping**

- 90% of sticky notes on map were aligned with other comments submitted
- 10% were unique comments not previously submitted

**Survey**

- 105 online respondents; 12 hard copy submissions

**Community Open House Comments**

- 29 Event Comment Forms submitted
  - 48% submitted comments; 52% only submitted feedback on open house content and information for contact list
  - 80% said they were provided enough information to understand the project; 17% responded somewhat and 1 respondent said they were not provided enough information.

## What We Heard From Public Engagement

Written feedback from during the public engagement was generally similar to what has been provided by the LAC:

- The ESA is a unique feature; protecting and restoring/maintaining ecological integrity is the first priority
- There is a desire for more learning/education opportunities within the ESA
- Management of the ESA to continue to include invasive species removal
- Requests for more enforcement of by-laws (e.g. off-leash dogs, bicycles, encroachment)
- Improvements of trails in sections is an area of importance.
  - Some muddy, icy and wet areas are present along the trail system; requests for boardwalks or other solutions
  - Monitoring in the ESA is important

## What We Heard From Public Engagement

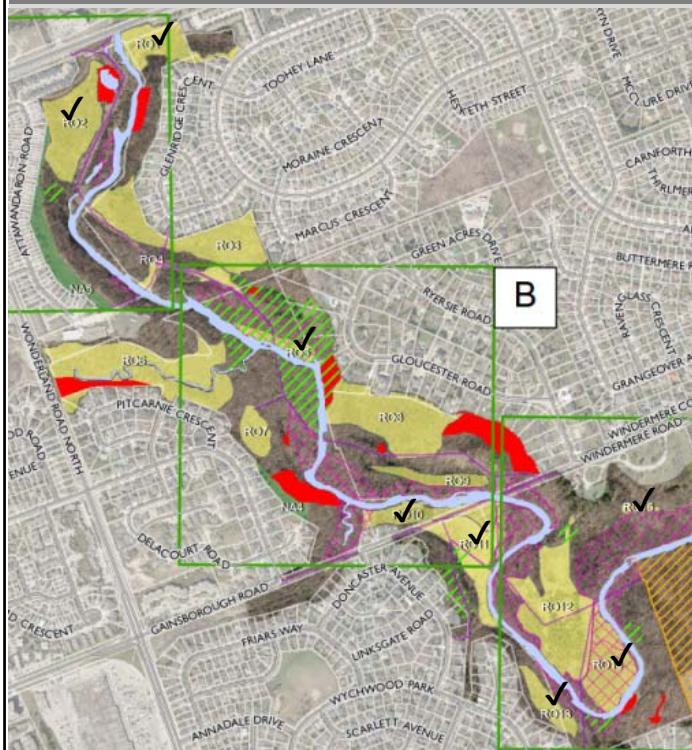

- There is a desire for connectivity/continuity of trails throughout the ESA (i.e. better linkages, bridges, easements through private property, etc.)
- Opposition to the closing of other “existing” trails, including a mix of managed and informal
- There is a desire for some closed trails (i.e. Gainsborough Ravine to Snake Creek Valley) to be re-opened.
- There is opposition to paving of trails but some asked for multi-use paths

Gainsborough to Snake Creek Trail – temporarily closed – relocate Trail onto lawn area then ecologically restore lawn

## Environmental Management Strategy: Restoration

- Previous Work - Majority of restoration work underway in 8 of 15 Restoration Overlays (RO) on Figure 2
- High Priority RO 5, 14 & 15 to protect SAR implemented in 2013-2017
- City / Dillon & UTRCA recognized for innovative work, SAR habitat protection and contributions to the [Federal Recovery Strategy for the False Rue-anemone \(\*Enemion biternatum\*\) in Canada](#)
- Phragmites high priority in all ESAs incl. Medway. Control since 2013 (RO 1 & 2)
- Current Work to manage Periwinkle, Goutweed, Buckthorn, Norway Maple, Phragmites, Loosestrife, and, native tree / shrub plantings and 74 ash tree EAB injections continues (RO 10, 11 & 13)
- Garlic Mustard pulled by SF Adopt an ESA
- Future Work – implement RO3, 4, 6, 7, 8, 9 & 12 to manage Buckthorn, Snowdrops, Woodland Sedge, plant trees & continue monitoring

## Environmental Management Strategy: Naturalization

- NA1, NA2 and NA3
  - Part of RO9, RO11, RO12
- NA4: Identified during Phase I
- NA5: Identified during Phase II
- High quality ecological restoration of mown lawn areas into native meadows and succession to woodland
- Restoration work in association with trail implementation over lawn areas could define limit of restoration and limit future encroachment

## Draft Trail Management Plan

### Considerations Raised by LAC / Public Consultation

- Access
- Existing Unmanaged Trails
- Connectivity of Managed Trail System
- Trail Condition
- Non-permitted Uses
- Population Growth
- Bank Migration

Photo: Example of muddy/wet Level 1 trail over sewer alignment / Utility Overlay south of Glenridge Drive, east side of ESA, near Access 10

## Trail Management - Access and Wayfinding

### Signage in ESAs as described in Guidelines are:

- Informational / Regulatory / Warning
- Interpretive
- Designation / Directional
- Access Point Signs: ESA name, pictographs for rules, QR codes - Brochure / Observation Reports, and, use at own risk. Complete rules / by-law sign on the back.

### New AODA compliant signage at all access points to include a map and identify:

- The length of trail
- The type of surface of which the trail is constructed
- The average and minimum trail width
- The average and maximum running and cross slope
- The location of amenities, where provided

Current ESA Access Point Signage

## Trail Management Suggestions from Public

- All significant ecological features identified in Phase 1 were found to be compatible with the existing managed trails based on Chart 2 from the Guidelines for Management Zones and Trails in ESAs.
- -Documented in the Addendum to Phase I and approved by Council (February 14, 2017)

### Next Step - Use the Guidelines to:

- Review trail management **suggestions from the Public**
- Provide **3 Draft Trail Concept Plans** that comply with Guidelines, enhance protection of features & improve accessibility - for review and comment:
  1. DRAFT "Enhanced As Is" Trail Concept Plan
  2. DRAFT "Partial Improved Connectivity" Trail Concept Plan
  3. DRAFT "Enhanced Connectivity" Trail Concept Plan

## Draft Trail Management Plan Enhanced "As-Is" System

**Chart 2: Review of Significant Ecological Features and Trail Recommendation for Existing Trails**

### Overlay The Existing Trail System Onto Management Zones

- obtain trail map(s) from the City or UTRCA
- map significant ecological features that require further review for compatibility with trails (based on **Table 1**)

### Identify Significant Ecological Features That Overlap The Trail System

Consult government resources for guidance on managing the interaction between significant ecological feature(s) and existing trails

Trail to Remain  
No further action required

Trail to Remain  
Requires a Redesign

Trail Requires  
Rerouting or Relocation

Closure of Trail

## Draft Trail Management Plan Enhanced “As-Is” System

**Trail to Remain  
Requires a  
Redesign**

**“Keep the existing trail and include design  
features to preserve ecological integrity”**

This includes:

- Improvements to trails in muddy / wet areas etc. to reduce impact and improve accessibility
- Better alignment of trails with Utility Overlay to minimize impacts while accommodating persons with disabilities wherever possible.

**Trail Requires  
Rerouting or  
Relocation**

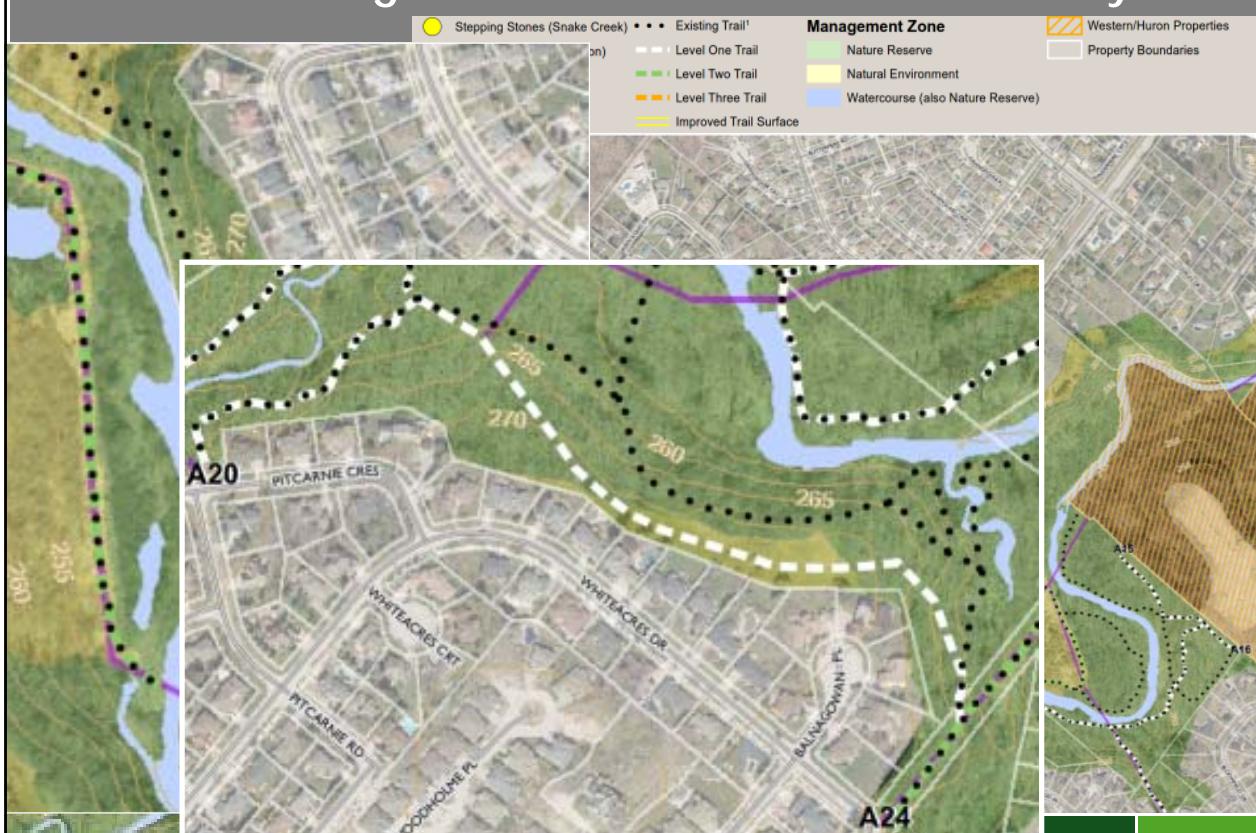

**“Realign the trail to avoid the significant  
ecological feature”**

This includes:

- Realignment and reopening of temporarily closed managed trail

## Draft Trail Management Plan: Enhanced “As-Is” System

# Draft Trail Management Plan

## Establishing “Partial Connectivity”

**Chart 3: Review of Significant Ecological Features and Trail Recommendations for New Trails**

### Map Significant Ecological Features Over Management Zone Map

- only map significant ecological features that require further review for compatibility with trails (based on **Table 1**)

Consult government resources for guidance on assessing the interaction between significant ecological features and new trails

If trails are incompatible with significant ecological feature:

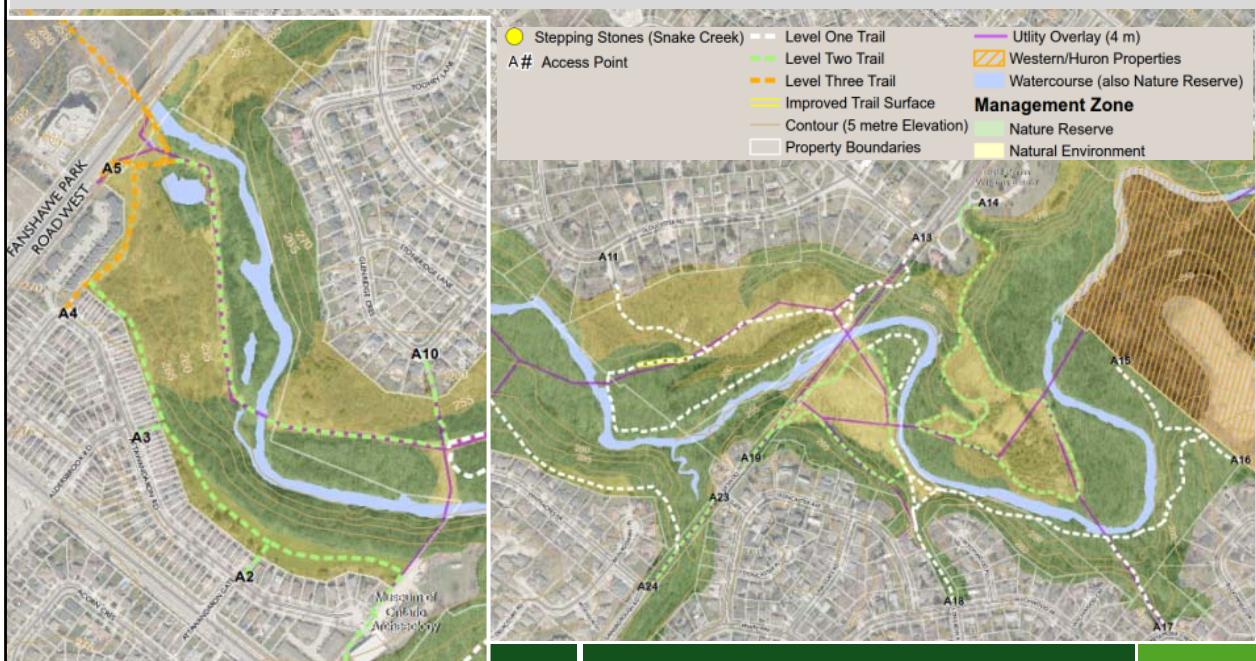

Trail Not Permitted

If trails are compatible with significant ecological feature, proceed with trail planning according to sustainable design practices

## Trail Management: Establishing Partial Connectivity

- In addition to the “As-Is” system:

# Draft Trail Management Plan “Enhanced Connectivity”

## Connectivity across Medway Creek:

- Linkage would be considered a “new segment of trail”
  - Linkage refers to a “connection area over water”
  - Mechanism to provide connection not yet defined

**Chart 3: Review of Significant Ecological Features and Trail Recommendations for New Trails**

**Map Significant Ecological Features Over Management Zone Map**

- only map significant ecological features that require further review for compatibility with trails (based on **Table 1**)

Consult government resources for guidance on assessing the interaction between significant ecological features and new trails

If trails are incompatible with significant ecological feature:  
Trail Not Permitted

If trails are compatible with significant ecological feature, proceed with trail planning according to sustainable design practices
