

Dear members of the committee,

My neighbors and my family are some of the residents directly affected by some of these issues.

Our backyards bordering onto one of the building lots on Tribal Wood Street, we have for about 8 years experienced the constant dust and weeds growing 8-10 feet high. Every year it is the same thing, we complain to our councilor or in some cases to the developer. Some years these issues were addressed, some years they're not. If they are addressed then it's a one or two time thing and then left again.

At this point we are boxed in by three different developments, the one directly behind us, one to the north on Fanshawe Park Rd., and the other at the southwest end of Blackacres Blvd. Every time there is heavy winds from either direction we're inundated with dust and garbage and weed seeds.

I am sure I'm speaking for the rest of my neighbors, when I say that Councillor Morgan has our full support for his motion.

Thank You

Herman Loibl
