Neighbourhood Watch London

Neighbourhood Watch Program Crime Statistics
2014 - 2016

Neighbourhood Watch London and the London Police Crime Analyst Unit have worked together to analyze crime comparisons both inside and outside a Neighbourhood Watch Area. Each crime category is based on citywide statistics for both the total population of London and the Neighbourhood Watch population.

Excluding Downtown

Crime Class	Citywide					NWL Areas				
	2014	2015	2016	Average	Per 100,000 Pop.	2014	2015	2016	Average	Per 100,000 Pop.
Robbery	162	211	218	197	51	6	3	1	3	5
Commercial B&E	438	378	436	417	109	2	4	7	4	7
Residential B&E	1151	931	1002	1028	268	84	79	68	77	121
Motor Vehicle Theft	750	873	797	807	210	35	30	33	33	51
Theft from Motor Vehicle	2948	2298	2579	2608	680	200	196	170	189	296
Vandalism	3588	3645	3994	3742	975	182	209	212	201	315

The above class of offence types is core-centric with the highest density of these offences taking place in the downtown area (generally Thames River to Adelaide, and Oxford St. to the tracks near York St.) where there are not too many Neighbourhood Watch Areas... which is why we excluded the downtown area.

"Helping build welcoming, inclusive and informed communities where
all neighbours are safe and secure"
