

## City of London

### One River Master Plan Environmental Assessment Study

#### NOTICE OF PUBLIC INFORMATION CENTRE

The City of London has retained CH2M to undertake a Municipal Class Environmental Assessment (EA).

The purpose of the One River Master Plan EA is to develop a comprehensive plan, through engagement with First Nations and Métis, and in consultation with the public, and agency stakeholders, for implementing various projects within the One River study area. These projects will represent both infrastructure needs and the community's recreational and ecological vision for the Thames River in the City. This study will follow the Municipal Class EA Process as a Master Plan. The EA Study Area extends from Downtown London (The Forks) downstream past the Springbank Dam.

The approach of the study is to first consider the future of the Springbank Dam (Stage 1) through a defined evaluation process, and then develop and assess a list of infrastructure projects, including the "Back to the River" design, which will address additional aspects of a long-term river management strategy (Stage 2).

Two Public Information Centres (PICs) are being held to provide details on the EA process, how the alternatives for the Springbank Dam will be evaluated, as well as to receive input and comments from interested parties and the public. The two PICs will both provide the same content and be presented in open-house type formats. The details of each PIC are below.

**PIC #1**      Wednesday October  
**Date:**      18, 2017  
**Time:**      4:00 pm to 8:00 pm  
                  (drop-in format)

**PIC #2**      Thursday October 19,  
**Date:**      2017  
**Time:**      4:00 pm to 8:00 pm  
                  (drop-in format)

**Location:** London Public Library,  
                  Central  
                  251 Dundas St.  
                  London, ON N6A 6H9

**Location:** Goodwill Industries 255  
                  Horton Street London,  
                  ON N6B 1L1

City Staff and the project team from CH2M will be available to discuss the information presented. Comments received at the PICs will be considered in the selection of the preferred alternative for Springbank Dam.

For further information or if you are unable to attend a PIC and wish to provide your comments, please contact a member of the project team:
