Subject: drainage

I have a problem with drainage on my property. My neighbor block the drainage and change the grading levels. No body wants to help. I am struggling with this for six years. We have by-laws but city does not enforce their own by-laws. We innocent people pay the price. Why we have so many engineers , professional workers, so many plans, rules and permits to build a new subdivision and than city allowed somebody to change drainage and grading to make a damage to the next property?????

I would like to discuses with committee, what can be done to protect innocent people. We have a right to buy a home and live our life, not just be outside and pump neighbor water to protect our home.
