

Issues for Investigation

Aim: Increase data on which to rely in assessing environmental impacts, making recommendations, debating (specifically on EEPAC related topics)

Examples:

1. Crime Prevention Through Environmental Design (CPTED)
 - How effective is an ESA vs Springbank Park as it pertains to dogs off leash?
2. Paved vs. gravel trails – what is the impact on water flow?
3. Does upgrading a trail actually reduce ad-hoc trails? By how much?

What contacts do we have?

What relevant subject expertise?

Can we devise some tractable studies?
