LINK TO 2015-2019 STRATEGIC PLAN

Council's 2015-2019 Strategic Plan for the City of London identifies "Leading in Public Service" as one of four strategic areas of focus. The City of London's Credit Rating Report supports this strategic area of focus by contributing towards the strategic priority "Proactive financial management". The "Proactive financial management" strategic priority involves, among other things, making sure that the City's finances are well planned and that they support intergenerational equity. The presence and adherence to financial policies and practices has helped the City maintain positive operating results, stable debt levels, and strong liquidity, reflected in the credit rating assigned by Moody's.

BACKGROUND

Moody's Investors Service (Moody's) is a leading provider of credit ratings, research, and risk analysis. The firm's ratings and analysis track debt covering more than 135 sovereign nations, approximately 5,000 non-financial corporate issuers, 4,000 financial institutions issuers, 18,000 public finance issuers, 11,000 structured finance transactions, and 1,000 infrastructure and project finance issuers. Typically, Moody's reviews the credit worthiness of the City of London (the "City") annually and then assigns the City a credit rating. However, the credit quality of most issuers and their obligations is not fixed and steady over a period of time. For this reason, changes in ratings can occur in the interim to reflect variations in the position of issuers and their obligations.

On April 17, 2018, Moody's changed the credit rating outlook to negative from stable for the Province of Ontario (Aa2 negative). A Moody's rating outlook is an opinion regarding the likely rating direction over the medium term. Historically, approximately one-third of issuers have their credit rating downgraded (upgraded) within 18 months of the assignment of a negative (positive) rating outlook.

Following this rating action, Moody's also conducted a review of the credit ratings of regional and local governments and government-related issuers in the Province of Ontario, including the City of London. The purpose of this review was to assess the macroeconomic and funding linkages between these issuers and the Province of Ontario.

Despite the change in outlook on the Province of Ontario rating, Moody's has affirmed the Aaa credit rating and stable outlook for the City of London. The credit opinion of the City published April 24, 2018 from Moody's is attached to this report. The City has held the Aaa rating since 1977, the highest rating possible. The stable outlook for the City's Aaa debt rating reflects Moody's expectation that liquidity will remain strong, debt will remain stable and the City will continue to post positive operating results. The Aaa rating is integral in securing buyers for the City's debentures at favourable interest rates.

The decision to affirm the City of London's credit rating reflects Moody's view that the pressures behind the negative outlook assigned to the Province of Ontario, such as the rising debt and interest expense, are not expected to impact London's intrinsic credit profile. It is Moody's opinion that the credit worthiness of the City of London, including high dependence on own-source revenues, which are insulated from provincial fiscal pressures, strong reserve levels and track record of managing operating pressures, provides the ability to withstand a potential downgrade to the province. Moody's also does not anticipate any change to the funding provided by the province nor a change in responsibilities of service deliveries between the province and the City of London.

Moody's comments regarding the City's prudent fiscal plan and track record of generating positive fiscal results are as follows:

"...the City of London displays strong governance and management practices, such as the application of multi-year budgets, which helps promote stable operations. London's recent history of positive operating results, application of strict controls on debt issuance, and conservative debt and investment policies which limit their exposure to market related risks and help ensure relatively smooth debt servicing costs all act as evidence of the city's strong management and governance."

The comments provided by Moody's in their review of the City of London's credit rating further supports the strategy taken by Council to ensure that the City's finances are well-planned. The application of the multi-year budget signifies that the City is looking beyond a short term focus when planning out its finances. The City's multi-year budget provides alignment of longer-term goals with longer-term funding plans, improved accountability and transparency over spending changes. Taking a long-term view with respect to financial matters has led to fiscally responsible decisions, as reflected in the City's credit rating.

Moody's will be conducting their more detailed annual review of the City's credit rating in the summer of 2018, which will include a review of the City's 2017 financial statements, 2018 Annual Budget Update, forecasts, a site visit to the City and other independent research.

The affirmation of the City's Aaa credit rating and stable outlook is a testament to the City's standalone credit strength.

City of London (Canada)

Update following affirmation of Aaa rating

Summary

The credit profile of the [City of London \(Aaa stable\)](#) reflects the correlated combination of a relatively low debt burden and sizeable levels of reserves relative to the debt burden. Through an increased use of reserves and decreased reliance on debt issuance to fund capital projects than in the past, London's net direct and indirect debt relative to operating revenue fell from 42.4% in 2012 to 30.4% in 2016 with further declines anticipated. Concurrently, the city's holdings of cash and investments, including those to be used for financing capital projects in lieu of debt, has increased to 259.1% of net debt as of December 31, 2016. This provides considerable liquidity and a measure of safety for debenture holders. The rating also reflects the city's strong track record of achieving positive operating results and the generation of internal financing for capital expenditures.

Exhibit 1

London's efforts to rely less on debt will lead to a reduced debt burden and interest expense across the medium term

Source: Moody's Investors Service, City of London 2016-19 Budget

Credit strengths

- » High levels of cash and investments provide strong liquidity
- » Low debt levels supported by conservative debt management practices
- » Mature, supportive, institutional framework governing municipalities in Ontario
- » Prudent fiscal plan with track record of generating positive fiscal outcomes

Credit challenges

- » Use of one-time measures to balance budget

Rating outlook

The outlook for London's Aaa debt rating is stable, reflecting our expectation that liquidity will remain strong, debt will remain stable and the city will continue to post positive operating results.

Factors that could lead to a downgrade

Downward pressure could arise if the city were to experience a sustained loss of fiscal discipline leading to a material increase in debt or substantial reduction in accessible financial reserves.

Detailed credit considerations

On 20 April 2018 [we affirmed the City of London's Aaa rating and stable outlook](#). The decision to affirm the rating reflects our view that the pressures behind the negative outlook assigned to the Province of Ontario are not expected to impact London's intrinsic credit profile. We do not anticipate any change to the funding provided by the province nor a change in responsibilities of service deliveries between the two levels of government.

The City of London's Aaa rating combines (1) a baseline credit assessment (BCA) of Aaa, and (2) a high likelihood of extraordinary support coming from the [Province of Ontario \(Aa2 negative\)](#) in the event London faced acute liquidity stress.

Baseline credit assessment

High levels of cash and investments provide strong liquidity

London's credit profile is supported by a strong liquidity position which provides a significant measure of safety for bondholders. The city's cash and investments measured CAD873.2 million as of December 31, 2016, an increase of 9.8% compared to the previous year. The level in 2016 equaled 259.1% of net direct and indirect debt and approximately 101.4% of operating expenses. Over the past decade the city's cash and investment holdings have increased substantially, rising to their current level from 47% of net direct and indirect debt and only 29.9% of operating expenses in 2005, highlighting the prudent fiscal management and liquidity strength that London possesses.

The city's cash and reserve holdings will remain healthy even as the city moves forward with the approval of a CAD500 million bus rapid transit infrastructure project, of which the city is expected to fund CAD130 million. The city's portion is expected to be funded from cash and development charges. The remaining funds are expected to come from both the Canadian and Ontario governments. Construction may begin as early as 2019.

London's investment policies ensure that the city minimizes credit risk and maintains liquidity of its investment portfolio. The city's policies outline various limits placed on investment decisions, such as limiting the concentration of investments in specific sectors or issuers, limiting investments to only highly rated securities and ensuring a variety of maturities. The presence and adherence to these

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

policies offers reassurance that the city's investment management policies provide security to liquidity, which along with the level of liquidity, is a strong credit positive.

Low debt levels supported by conservative debt management practices

The city of London's net direct and indirect debt expressed as a percentage of operating revenues measured 30.4% in 2016. This measure has been declining over the past several years, propelled by the conservative debt policies that the city employs such as the self-imposed "debt cap" which limits the amount of debt that can be issued for capital projects as well as the move to a greater reliance on pay-as-you-go financing. Debt issuance is also limited through the use of multiple policies overseeing the use of excess funds at year end; the city applies all year-end debt service savings and 50% of unallocated assessment growth as well as 50% of any operating surplus that it generates towards financing needs that would have come from authorized, but unissued, debt.

The low debt burden also translates into a relatively low interest expense. In 2016, interest expense consumed only 0.9% of operating revenues. Given the efforts to minimize debt issuance, the city's debt service costs as a percentage of revenue are expected to remain low in the intermediate term.

London's updated 2016-2019 property tax supported capital plan calls for expenditures of CAD903.6 million. Of the total amount, CAD243.4 million (27%) will require debt financing, a level that was relatively unchanged from the initial plan. In 2017, capital financing from reserves should reach CAD55.3 million in addition to CAD37.0 million raised from the capital levy (pay-as-you-go financing), representing 43% of capital spending planned for the year. The relative share of annual funding from these sources are expected to remain stable during the current planning cycle through 2019. In the 2016-19 capital plan, 57% of spending will be in the non-taxpayer supported category, much of which is expected to be covered through development charges and government grants. If the current capital plan comes to fruition, which forecasts average annual debt financing requirements of CAD26 million for the tax supported projects, we anticipate that the city's debt burden will continue to slowly fall over the medium-term. This is also aided by the city's target of eliminating debt for lifecycle maintenance by 2022.

Mature, supportive institutional framework governing municipalities in Ontario

The institutional framework governing municipalities in Ontario is mature and highly developed. The division of roles and responsibilities between the province and municipalities is clearly articulated. Historically, changes to the institutional framework have occurred at a measured, evolutionary pace, following discussions between both parties. Nevertheless, in certain cases, changes have occurred more rapidly.

London's creditworthiness benefits from the stability inherent in the provincial institutional framework. Provincial legislation dictates a high degree of oversight, including limits on debt servicing costs, while policy flexibility, on both the revenue and expenditure sides of the ledger, helps London to manage pressures as they arise.

Prudent fiscal plan with track record of generating positive fiscal outcomes

Similar to other highly rated Ontario municipalities, the City of London displays strong governance and management practices, such as the application of multi-year budgets, which helps to promote stable operations. London's recent history of posting positive operating results, application of strict controls on debt issuance, and conservative debt and investment policies which limit their exposure to market related risks and help ensure relatively smooth debt servicing costs all act as evidence of the city's strong management and governance.

In 2016 the city moved away from annual budgets, instead opting to pass a 4-year operating budget that spans the 2016 - 2019 period. Through this process, annual departmental expenditures for the next four years are determined in the initial budget year, and in theory only expenditures that are supported through additional assessment growth can be passed outside of the initial budget. City Council can still raise property taxes above the approved rates as part of the annual budget review process, however barring this the approved property tax increases should average 2.8% annually for the budget cycle.

While the move to four year operating budgets highlights the city's commitment to long term planning, this process could create challenges as council attempts to cope with unforeseen expenditure pressures that may arise throughout the budgeting cycle. However, we note that Budget 2017 was approved largely in line with the 2016-19 plan forecasts, with only minimal amendments required. We will monitor this process closely to ensure the city is able to adhere to expenditure growth in line with the approved average 2.8% property tax increases.

In 2016 the city posted a consolidated surplus of CAD166.9 million, equivalent to 14.1% of total revenues, continuing the trend of positive fiscal outcomes seen in recent years. Operating revenue increased 5.9% in 2016, above levels seen in recent years, however operating expenses grew by only 0.5%.

Use of one-time measures to balance budget

Although the city has recorded strong results, and Budget 2017 was not materially different from the path set out in the 2016-19 four-year budget plan, new ongoing initiatives introduced in 2017 were funded by non-recurring one-time sources.

The pressure in 2017 was relatively small, roughly CAD1.3 million in a budget in excess of CAD860 million, however it does reflect council's view that property tax increases are elevated and other means are necessary to balance the budget. In 2018 the property tax levy increase was 2.8%.

We noted London relied on this unsustainable approach to larger degrees in 2013 and 2014. The return of using unsustainable funding sources raises the possibility that other elements in the budget will be reduced, such as pay-as-you-go capital financing which would result in higher debt issuance. Additionally, the inability to find sustainable funding for such a relatively small amount also suggests the city could face pressure from rising expenditure costs, notably labour, within a context of maintaining affordable property tax increases.

Extraordinary support considerations

Moody's assigns a high likelihood of extraordinary support from the Province of Ontario (Aa2 negative), reflecting Moody's assessment of the incentive provided to the provincial government of minimizing the risk of potential disruptions to capital markets if London, or any other Ontario municipality, were to default.

Output of the baseline credit assessment scorecard

In the case of London, the BCA matrix generates an estimated BCA of aa1, close to the BCA of aaa assigned by the rating committee. The matrix-generated BCA of aa1 reflects (1) an idiosyncratic risk score of 2 (presented below) on a 1 to 9 scale, where 1 represents the strongest relative credit quality and 9 the weakest; and (2) a systemic risk score of Aaa, as reflected in the sovereign bond rating (Aaa stable).

For details of our rating approach, please refer to the methodology [Regional and Local Governments](#), 16 January 2018
