

ACE Plight of Pollinators, May 2, 2018 - Recommendations

Recommendation 1. For London to become a Bee City by certifying with Bee City Canada. In this way we can be recognized as a leader within Canada in the creation of bee-friendly cities. We can also participate in future activities organized by Bee City Canada.

Recommendation 2: Identify potential sites (on public land) across the city where pollinator habitat (garden, meadow) may be planted either by city staff or community groups. These sites may comprise parks or right-of-way areas next to roads and railways.

Recommendation 3: Set aside funds in the next 4 year budget cycle to support the implementation of the pollinator-related policies identified in the London Plan.
