

Review of the Forthcoming City of London Complete Streets Design Manual

Presentation to the Diversity, Inclusion and Anti-
Oppression Advisory Committee
May 17, 2018

Introduction - What are Complete Streets?

“A complete street is one that is designed to accommodate the mobility needs of **all ages, abilities, and modes of travel**. Safe and comfortable access for **pedestrians, bicycles, transit users, and the mobility challenged** are not design after-thoughts, but are **integral to the planning of the street** from the start.”

- London Transportation Master Plan

Introduction – Complete Streets Manuals

Complete Streets Guides & Manuals have been developed by **many cities around the world** to help **direct and coordinate** street planning/design towards more balanced mobility options

Background

The 2016 City of London Official Plan introduced a group of **Street Classifications**, which set the stage for more **context sensitive city building policies** and **redefining mobility** for Londoners

Classifications Include:

- Rapid Transit Boulevards
- Urban Thoroughfares
- Civic Boulevards
- Main Streets
- Neighbourhood Connectors
- Neighbourhood Streets
- Rural Thoroughfares
- Rural Connectors

EXCITING. EXCEPTIONAL. CONNECTED.

Background

Each **Street Classifications** was accompanied with policies to guide future planning and design towards a an **intended character and function**, while progressing towards **overall mobility goals**

Background

Many stakeholders were included in consultation efforts for the development of the Complete Streets Design Manual and attended a **Stakeholder Workshop**, held on June 2nd, 2017. These groups included:

- Accessibility Advisory Committee
- Can-Bike
- Hyde Park Business Association
- Bell
- London Middlesex Road Safety Committee
- Middlesex Health Unit
- Start Communications
- Cycling Advisory Committee
- London Fire
- London Development Institute (LDI)

- London Hydro
- London Transit
- Union Gas
- Tree and Forests Advisory Committee
- Argyle BIA
- City of London Water
- London Environmental Network
- City of London Development Services

Goals

The City of London Official Plan suggested the preparation of a Complete Streets Manual to establish:

- Overall cross-sections for the street classifications
- Design parameters for the public realm

COMPLETE STREETS: VISION AND PRINCIPLES

Local Policy Support

“ At the local level, policy support for complete streets is found in a number of documents, including the:

- Strategic Plan
- The London Plan
- Downtown Plan
- Design Specifications and Requirements Manual
- Cycling Master Plan
- London Rapid Transit

**COMPLETE
STREETS: VISION
AND PRINCIPLES**

Local Policy Support

“Municipal Council adopted the following Vision Zero Principles:

- No loss of life is acceptable
- Traffic fatalities and serious injuries are preventable
- We all make mistakes
- We are all physically vulnerable when involved in motor vehicle collisions
- Eliminating fatalities and serious injuries is a shared responsibility between road users and those who design and maintain our roadways”

**COMPLETE
STREETS: VISION

Emphasize Vitality

Prioritize Connectivity

Ensure Context Sensitivity

**COMPLETE
STREETS: VISION
AND PRINCIPLES**

Core Principles

Prioritize Safe and Accessible Options for People

“The safety and mobility needs of all users is a priority in any street design exercise.”

Emphasize Vitality

“Streets that attract pedestrians enhance urban vitality in London.”

**COMPLETE
STREETS: VISION
AND PRINCIPLES**

Accessibility

The Manual defines what a pedestrian is, describes the central role of walking and mobility device travel within London and outlines how the City will support pedestrians through Complete Streets.

Key considerations:

- Tactile walking surface indicators
- Separation of pedestrians and cyclists where practical
- Consideration of user needs and land uses in prioritizing street elements such as sidewalk width
- Design processes that emphasize consultation with stakeholder groups
- Pedestrian crossing refuge islands
- Accessible transit stop design

ELEMENTS OF COMPLETE STREETS

“Provide connectivity:
As the slowest mode of transportation, pedestrians have the greatest sensitivity to route directness.”

“Prioritize vulnerable users:
Cyclists are more vulnerable than transit riders and motorists in a collision because they are not protected within a vehicle.”

ELEMENTS OF COMPLETE STREETS

Design For Accessibility

“Pedestrians include those who are using a walker, crutches, a wheelchair or an electrically powered mobility device as well as individuals with a visual impairment. Design features should be used to accommodate all of London’s pedestrians, such as:

- appropriately wide pedestrian clearways;
- audible pedestrian signals;
- tactile walking surface indicators (TWSIs);
- visually contrasting surface treatments; and
- amenities such as seating
