## TransitSMS (Put Timetable directly into your mobile)

---

**A service provides residents of our community with the ability to receive real-time London Transit Commission bus information for any stop# for any time on any mobile device via SMS.**

Give London Transit's customer a real-time timetable.

No Mobile Data plan required to obtain a real-time timetable.

No training required.

No software to install.

Work with all mobile phone.

Objectives:

- 24/7
- Easy to use
- Convenient.
- Minimum effort, cost.

# TransitSMS

---

## The process

### 1) Send SMS with

<BUS#> <StopID#> {RequiredTime}

### 2) Receive SMS information

4 appointments

1 before RequiredTime.

3 after RequiredTime.

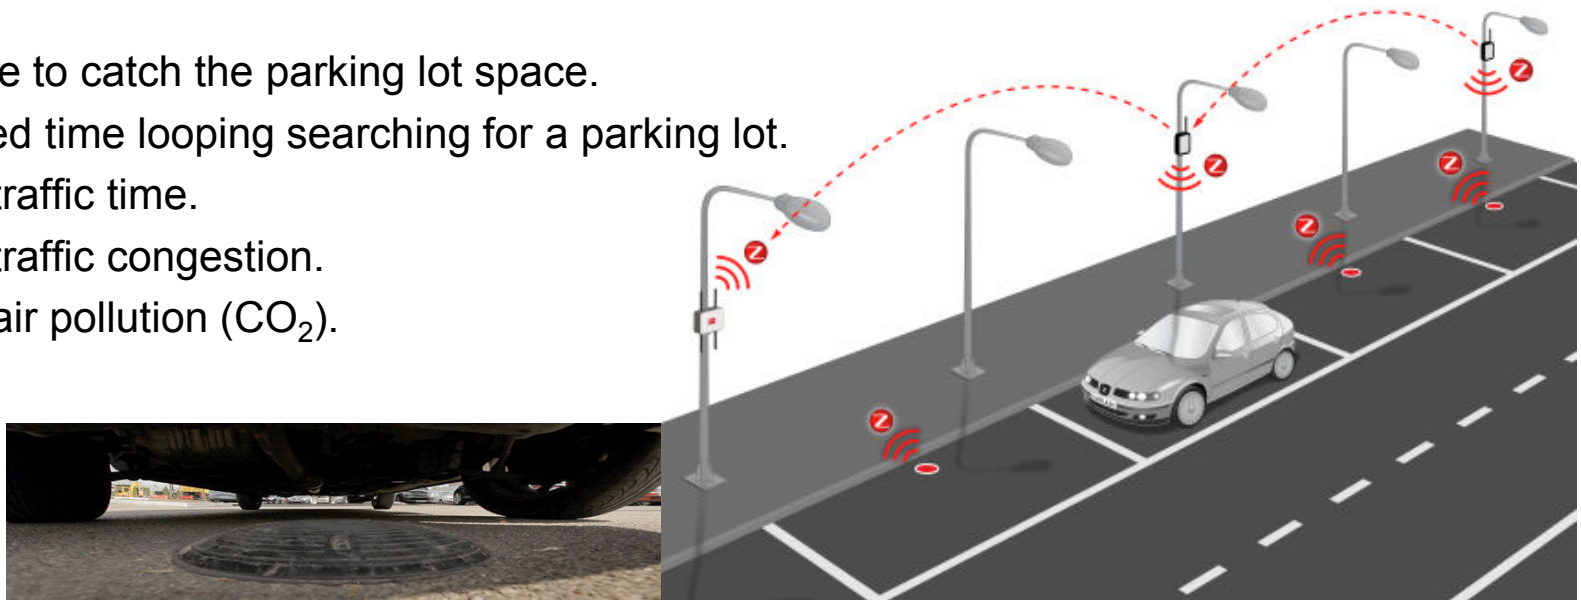

# City Smart Parking

---

**Integrated system to provide a residents of London with the ability to know availability and location of car park vacancies-close to him via street parking information panel or smartphone.**

Benefits :

- No hassle to catch the parking lot space.
- No wasted time looping searching for a parking lot.
- Reduce traffic time.
- Reduce traffic congestion.
- Reduce air pollution (CO<sub>2</sub>).

# City Smart Parking

---

## The process

You have 2 options to know free vacancies spaces close to you :-

*Option1:* Use smart phone application to guide you through GPS.

*Option2:* Look at Parking Information Panel ahead of each street.

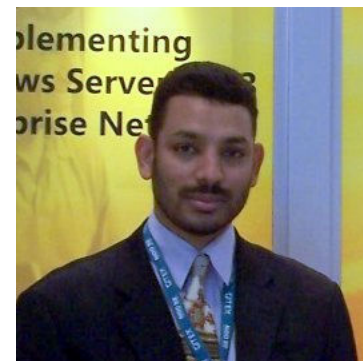

# Biography

---
